RG8's portfolio achieved a strong return of 11.4% in June,<sup>2</sup> driven by a number of the portfolio's higher conviction positions, particularly in South Korea.

The South Korean market proved a standout performer for the month, with the KOSPI surging over 13%, albeit still below its 2021 highs. The rally was fuelled by investor anticipation of newly elected President Lee Jae-myung's proposed corporate governance reforms, combined with cheap valuations and light positioning by global institutional investors. While pleasing, we are mindful of the rapid pace of this ascent and are closely monitoring for signs of market consolidation.

In China, a complex macro scenario persists. A temporary trade truce with the US has provided some relief, but significant tariffs and uncertainty remain. While domestic policy offers some support, numerous concerns remain, particularly around the property market, consumer sentiment and persistent deflation.

Japan's market continues to consolidate. We remain positive on Japan, particularly regarding its ongoing corporate reforms. In Taiwan, the market continues to rebound on renewed optimism regarding the outlook for the semiconductor sector.

Positive contributors for RG8 in June were widespread. Notable contributions included long positions in SK Hynix, SK Square, Zip Co, Samsung Electronics, TSMC and Alchip Technologies.

**Buy-back:** In June, approximately 0.3m RG8 shares were bought at an average price of \$1.92.

**FY25 result:** RG8 expects to release its FY25 result on Monday, 18 August.

<sup>1</sup> 'Post-Tax NTA' is calculated after tax on realised gains/losses, deferred tax assets and deferred tax liabilities, but before allowing for deferred tax liabilities/deferred tax assets on unrealised gains/losses. As at 30 June 2025, NTA after including deferred tax liabilities/deferred tax assets on unrealised gains/losses was \$2.49 per share, which includes \$0.10 per share of income tax losses available to the Company in future periods.

<sup>2</sup> Portfolio Return (Net) is shown after all applicable fees and expenses and is defined as the movement in pre-tax NTA, adjusting for payments owed to/from taxation authorities from earlier periods, plus dividends. Last 12 Months is the 12-month period ending on the last day of the month of the performance that is reported in this document ("Month End"). Dividend Yield refers to dividends that have been determined by RG8's Board where the ex-date occurred during the relevant Last 12 Months period and has been calculated using the Share Price at the Month End of this report. Past performance is not a reliable indicator of future performance.

<sup>3</sup> Based on RG8's closing share price of \$2.06 on 30 June 2025. Dividend yield of 8.3% assumes 100% franking.
