The investment objective of the Fund is to provide long-term capital appreciation. As described in the PDS, the Fund, via the Underlying Fund, invests primarily in equity securities of companies in globally developed markets. The Underlying Fund may also invest in global emerging markets. The Underlying

Fund, under normal circumstances, invests at least 80% of its assets in equity securities and equity-related instruments.

The notional derivatives exposure reported above is the total market value of the underlying securities over which the derivative contracts have been written. This is distinct from the profit or loss of the derivative contracts.
