MARKET OVERVIEW

Australian equities rose 2.4% in July, recording record highs domestically as well as overseas in key markets like the S&P 500. Markets saw past escalating trade tensions and US tariff announcements such as a 50% tariff on copper, and a 15% tariff on EU imports. There was some reversal of past winners & losers as the financial year rolled over, with the previously strong financial sector falling 1% (CBA -3.7%), usurped by Health Care rising 9.1% (CSL +13.1%), a resurgent IT sector (+5.0%) and Materials (+4.1%) which benefited from rising commodity prices in iron ore and lithium. Noteworthy also was US tech companies reporting accelerating earnings underpinned by AI revenues being realised.

Long-term factor performance in July was mixed. Cyclical value and quality outperformed, while momentum and defensive value underperformed.

Some of the largest positive contributors to the Company's performance during the month were overweight positions in Pro Medicus, ANZ and HUB24 as well as underweight positions in NAB and Boss Energy. However, overweight positions in QBE Insurance and Helia as well as underweight positions in CSL, Aristocrat Leisure and Lynas Rare Earths detracted from relative performance.

The Company remains actively positioned to seek superior income than the benchmark.

Companies mentioned are illustrative only and not a recommendation to buy or sell any particular security.
