The WAM Strategic Value Limited (ASX: WAR) Board of Directors declared an increased fully franked full year dividend of 6.0 cents per share, with the fully franked final dividend being 3.0 cents per share. The fully franked full year dividend of 6.0 cents per share provides a fully franked dividend yield of 5.3%[†] and a grossed-up dividend yield of 7.6%[#].

The investment strategy is designed to deliver superior risk adjusted returns for investors, as demonstrated by providing asymmetrical returns in the months where the market fell. The investment portfolio increased 8.6%^{*} in the financial year to 30 June 2025. During the financial year, the investment portfolio held a higher-than-average cash balance of 27.6% when including cash receivable from the realisation of Global Data Centre Group (GDC) and Australian Unity Office Fund (ASX: AOF) during the period.

The S&P/ASX All Ordinaries Accumulation Index returned negative performance during four months in FY2025: October, December, February and March. The WAM Strategic Value investment portfolio outperformed the S&P/ASX All Ordinaries Accumulation Index in each of these four months, providing positive absolute performance in three of the four market drawdowns. During these periods of drawdown, collectively the S&P/ASX All Ordinaries Accumulation Index fell 11.4%. In contrast, the WAM Strategic Value investment portfolio decreased only 0.8% collectively, outperforming the Index by 10.6%, demonstrating its defensive characteristics.

Chairman and Lead Portfolio Manager Geoff Wilson AO said: "We positioned the investment portfolio to preserve capital in response to increased geopolitical tension and equity market volatility. This positioning allows us to deploy capital as and when opportunities present themselves."

During the period, the investment portfolio's allocation to equities (80.5% at 30 June 2025) provided a weighted average return of 9.4% and the investment portfolio exposure to cash and cash equivalents (19.5% as at 30 June 2025) provided a weighted average return of 4.1%. Total shareholder return (TSR) for the period was 4.4%, or 7.1% when including the value of franking credits.

At 30 June 2025, the Company's pre-tax NTA was \$1.26 per share and the theoretical 'look-through' NTA was \$1.50[†] per share, using the estimated or most recently available pre-tax NTA of the underlying investment portfolio. WAM Strategic Value's share price discount to the look-through pre-tax NTA was 28.3% at 30 June 2025, providing a compelling investment opportunity. Since inception in June 2021, the Company has paid 15.75 cents per share in dividends to shareholders and 22.5 cents per share including the value of franking credits.

^{*}Investment portfolio performance is before expenses, fees and taxes.

[†]Based on the 19 August 2025 share price of \$1.13 per share.

[#]Grossed-up dividend yield includes the value of franking credits and is based on a tax rate of 30.0%.

^{**}The Australian Accounting standards require the Company's pre-tax NTA to be calculated based on the market price (or share price) of the underlying investment portfolio. The Company's look-through pre-tax NTA is an estimation of the Company's pre-tax NTA calculated using the estimated or most recently available pre-tax NTA of the underlying investment portfolio as at the end of the month where available. The look-through pre-tax NTA of the Company is indicative only and provides an estimate for investors of the value of the underlying investment portfolio, assuming the share price discount to NTA of the underlying discounted asset opportunities are closed.

The Dividend Reinvestment Plan (DRP) is in operation and the recommended fully franked final dividend of 3.0 cents per share qualifies. The Board has the discretion to satisfy the DRP by transferring existing fully paid ordinary shares in the Company purchased on-market, by issuing new fully paid ordinary shares in the Company, or using a combination of both. Existing shares purchased on-market and allocated under the DRP will be allocated at the aggregate price of shares purchased on-market, less brokerage costs and other costs, divided by the number of shares purchased. New shares allotted under the DRP will be allotted at the volume weighted average market price (VWAP) of shares sold on the ASX over the four trading days commencing on the ex-dividend date. The DRP will operate without a discount for the final dividend. Further details on the DRP rules are available at: wilsonassetmanagement.com.au/wam-strategic-value/
