Brief Explanation and background to the above results:		
1. Following major portfolio value increases, Directors report a significant reduction in equity holdings by realisations in a strong stock-market. These resulted in a capital gain of \$11.3 million. Operating profit came in at \$500,000, boosted by higher dividend income but reduced by litigation costs. The Directors have increased the 2025 dividend payout by 67% with a "Special" dividend of 1.0 cents.		
2. The key event was the increased value of London City's 7% holding in Fiducian Group via a combination of strong stock-market conditions and a market recognition of the quality of this stock. We have been shareholders in Fiducian for over nineteen years and as this shareholding became overweighted in our portfolio we had to reduce our holding. The gain of \$11.3 million mainly arose the reduction in the Fiducian shareholding. In regard to our 9.2% equity holding in Excelsior Capital, London City remains negative and plans to call a Shareholder Meeting of that company to debate the validity of Excelsior investing shareholder funds in unlisted hedge funds.		
3. Legal action continues in the Federal Court of Australia seeking, primarily, relief that Excelsior be wound up and the funds returned to shareholders. We note with concern that a defendant and director has recently moved to Monaco in Europe, an issue not yet announced by Excelsior. London City is examining the implications of this move on the litigation.		
4. Since year end London City has reduced further its shareholding in Fiducian. Liquid funds now stand at over \$13 million. Portfolio values show slightly higher gains. Unaudited net worth per share is estimated to be 81.5 cents.

London City Equities Limited

Notes to the financial statements - 30 June 2025

Note 1: Summary of significant accounting policies

The financial report is a general purpose financial report that has been prepared in accordance with Australian Accounting Standards, including Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board and the Corporations Act 2001. International Financial Reporting Standards ("IFRS") form the basis of Australian Accounting Standards ("AASBs") adopted by the AASB. The financial statements have been prepared in accordance with AIFRS (Australian Equivalents to International Financial Reporting Standards).

The Company has endeavoured to adopt "plain English" where possible to assist in information transparency.

The following is a summary of the significant accounting policies adopted by the company in the preparation of the financial report. The accounting policies have been consistently applied, unless stated otherwise.

Basis of Accounting

London City Equities Limited is a listed public company incorporated and domiciled in Australia. It is a free standing company and its accounts are presented as such. The financial statements are prepared using the valuation methods described below for holdings of securities. All other items have been treated in accordance with historical cost convention.

In the application of the Company's accounting policies described above, the Directors are required to evaluate estimates and judgments that may be incorporated into the financial statements. Estimates and associated assumptions are based on historical experience and assume a reasonable expectation of future events. Actual results may differ from these estimates.

There are no estimates or judgments that have a material impact on the Company's financial results for the year ended 30 June 2025. All material financial assets are valued by reference to quoted prices and therefore no significant estimates or judgments are required in respect to their valuation.

(a) Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements and to the unused tax losses. The rate of 30% has been adopted for these statements.

Deferred tax assets and liabilities are offset as all current and deferred taxes relate to the Australian Taxation Office and can legally be settled on a net basis. Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those differences and losses.

A tax provision is made for the unrealised gain or loss on Trading Portfolio securities valued at market value through the Income Statement. A Tax rate of 30% has been adopted.

Where non-current Investment Portfolio assets are adjusted for unrealised gains or losses at balance date in the Unrealised Revaluation Reserve an assessed deferred tax liability or asset is created to reflect the applicable tax, even though there may be no intention to dispose of those holdings. The tax sum is applied to the Unrealised Revaluation Reserve on one hand and the deferred tax liability or asset on the other.

(b) Investments

The Company has two discrete types of investments - the Trading Portfolio (Current Assets) and the Investment Portfolio (Non-Current Assets). The Company is a long term investor. All investments are initially recognised at the fair value of the consideration given. After initial recognition, investments (classified as either Trading or Investment) are measured at their fair value. Fair Value of listed securities is determined by reference to the last sale price at the close of business at balance date. Gains or losses on Trading Portfolio investments are recognised in the Income Statement. Gains or losses on Portfolio investments are recognised as a separate component of equity in the Unrealised Revaluation Reserve.

London City Equities Limited

Notes to the financial statements - 30 June 2025

Note 1: Summary of significant accounting policies (Cont'd)

(c) Non-Current Assets

The carrying amounts of all non-current assets other than investments are reviewed at least annually to determine whether they are in excess of their recoverable amount. If the carrying amount of a non-current asset exceeds the recoverable amount, the asset is written down to the lower value. In assessing recoverable amounts, the relevant cash flows have been discounted to their present value.

(d) Derivatives

To a large extent the company may be exposed to fluctuations in interest rates with its activities. It is not the policy of the company to use derivative financial instruments. The company does not hedge its exposure to interest rates.

(e) Financial Risk issues

The economic entity has in place risk management controls supervised by the Board and the Audit, Compliance and Risk Management Committee. Risk issues are explained further in Note 16 of the financial statements.

(f) Cash and cash equivalents

For cash flow statement presentation purposes, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(g) Revenue

Interest revenue is recognised on a proportional basis taking into account the interest rates applicable to the financial assets. Dividend revenue is recognised when the right to receive a dividend has been established. Revenue from the rendering of a service is recognised upon meeting the relevant performance obligations.

(h) Goods and Services Tax

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the Australian Taxation Office (ATO). In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable where invoiced. The net amount of GST recoverable from, or payable to the ATO is included with other payables in the balance sheet. Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the ATO, are reported as operating cash flows.

(i) Leases

A lessee is required to recognise, the commencement date of the lease, the present value of the remaining non-cancellable lease payments as a lease liability on the statement of financial position with a corresponding right-of-use asset. The unwinding of the financial charge on the lease liability includes depreciation and an interest borrowing rate expense. The Company has assessed that it is not a party to any arrangements that are required to be accounted for as Leases under AASB 16.

(j) New Standards and interpretations not yet adopted.

The Australian Accounting Standards Board has issued a number of new and amended Accounting Standards and Interpretations that have mandatory application dates for future reporting periods. The reported results and position of the Company are not anticipated to materially impact the Company's existing accounting policies. Adoption will, however, result in changes to information currently disclosed in the financial statements. The Company does not intend to adopt any of these pronouncements before their effective date.

(k) Consolidated Entity Disclosure Statement

As the Company is not required to prepare consolidated financial statements by Australian Accounting Standards, it is not required to present a consolidated entity disclosure statement.

(l) Financial Statements Approval

The financial statements were authorised for issue by the Board of Directors on 20 August 2025.

(d) Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up of the company in proportion to the number and amounts paid on the shares. On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll is entitled to one vote.

Note 13. Capital Management

The Company's objective in managing capital is to continue to provide shareholders with attractive investment returns over the medium to longer term through access to a steady stream of fully-franked dividends, minimal gearing and enhancement of capital invested. Its goals include paying dividends that, over time, grow faster than the rate of inflation.

The company recognises that its capital will fluctuate in accordance with market conditions and the performance of its underlying investments. It may adjust the amount of dividends paid, issue new shares from time to time, buy-back its own shares or sell assets to minimise debt. At present there is no share buy-back programme in operation. The company intends to pay dividends according to franked credits available.

(d) Nature and purpose of reserves

Realised Capital Gains Reserve

The Realised Capital Gains Reserve records realisation gains or losses from the sale of non-current assets. The reserves may be used for the distribution of bonus shares to shareholders and is available for the payment of cash dividends as permitted by law.

Unrealised Revaluation Reserve

The Unrealised Revaluation Reserve is used to record increments and decrements on the revaluation of non-current Investment Portfolio assets, as described in the accounting policies and adjusted to reflect the applicable deferred tax liability or asset. It is then reduced according to future tax benefits.

Note 16. Financial instruments and risk

A. Financial instruments - fair value of financial assets and liabilities

Accounting Standards require the disclosure of fair value measurements by level of the following fair value measurement hierarchy:

Level 1 - Quoted prices in active markets for identical assets or liabilities

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3 - Inputs for the asset or liabilities that are not based on observable market data (unobservable inputs).

B. Main Risk Considerations

London City's activities expose it to various financial risks, mainly market risk, credit risk and liquidity risk. Risk management is carried out by senior management under policies and strategies approved by the Board and the Audit, Compliance and Risk Management Committee. The company is not directly exposed to currency risk.

(a) Market Risk

This is the risk that the fair value of future cash flows of a financial instrument may fluctuate because of changes in market prices that depend on many factors including economic conditions and corporate profitability. London City seeks to reduce market risk by adhering to the prudent investment guidelines of its Board, including guidelines in respect of industry status, investee position in industry, performance outlook, management skills and level of strategic shareholding acquired. Price and Interest Rate risks are shown below.

(a) (i) Price Risk

The company is exposed to equities securities price risk. This arises from investments held by the company and classified on the balance sheet as either Trading or Investment. London City is not directly exposed to commodity price risk or derivative securities risk.

London City Equities Limited

Notes to the financial statements - 30 June 2025

Note 16. Financial instruments and risk (Cont'd)

Price Risk Sensitivity Analysis:

The table below summarises the pre-tax impact of both a general increase and general fall in stock-market prices by 10%. The analysis is based on the assumption that the movements are spread equally over all assets in the Trading and Investment Portfolios.

	---- 2025 ----		---- 2024 ----	
	10.0% increase in market prices	10.0% decrease in market prices	10.0% increase in market prices	10.0% decrease in market prices
	\$	\$	\$	\$
Impact on Profit (Pre tax)	(14,587)	14,587	(22,845)	22,845
Impact on Equity (Pre tax)	1,458,673	(1,458,673)	2,284,490	(2,284,490)

(a) (ii) Interest Rate Risk

This is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. At balance date London City had a proportion of its assets held in interest-bearing bank accounts and deposits at call. As such, the company's revenues and assets are subject to interest rate risk to the extent that the cash rate falls over any given period. Given that London City does not have any interest bearing liabilities at balance date, the Board and management do not consider it necessary to hedge the group's exposure to interest rate risk.

Interest Rate Risk Sensitivity Analysis:

London City's levels of Cash at Bank and on deposit are not material. It has no interest bearing liabilities. Accordingly impact of changing interest rates is not material.

(b) Credit Risk

The credit risk on the financial assets of an entity is the risk that one party to a financial instrument may cause a financial loss for the other party by failing to discharge an obligation. This credit risk for London City is minimised by its policy of placing surplus funds with the company's bankers.

(b) (i) Cash and Cash Equivalents

The credit risk of London City in relation to cash and cash equivalents is in the carrying amount and any accrued unpaid interest. The average weighted maturity of the cash portfolio at any time is no greater than 90 days. The credit quality of material deposits of cash and cash equivalents can be assessed by reference to external credit ratings.

	2025	2024
Cash at bank and short-term bank deposits:		
AA -	42,842	19,758

(b) (ii) Trade and sundry receivables

The credit risk of the company in relation to trade and sundry receivables is their carrying amounts. The sums are minor and relate mainly to accrued interest and prepayments. The risk is mitigated by internal monitoring.

(c) Liquidity Risk

This risk is that experienced by an entity when it has difficulties meeting its financial obligations. London City has no external formal borrowings. It manages liquidity carefully, recognising dividend inflow timing and maturity balances of term deposits and marketable securities. London City's Board and management actively reviews its liquidity position on a regular basis to ensure that the company can always meet its commitments, including investment programmes.

Note: Each holding includes 12,827,025 shares (2024 - 12,817,025 shares) held by Imperial Pacific Ltd.

(d) Remuneration Practices

1. The company has no executives.
2. The remuneration arrangements for directors are determined by the shareholders in general meeting. From time to time the Board may submit proposals to increase the fees, which are presently a maximum of \$125,000. The company has scope to remunerate Directors for special duties that may be requested on occasion.
3. There is a formal management agreement in place with Imperial Pacific Asset Management Pty Limited, a subsidiary of Imperial Pacific Limited. This was approved by shareholders on 22 November 2023 and provides for, inter alia, a term of 10 years from 22 November 2023 that continues until replaced. Fees are 1% of the portfolio value, together with possible performance fees of 15% of any gain achieved above the performance of the S&P ASX 300 Accum Index movement. The total basic fee payable during 2025 was \$255,903 (\$207,141 in 2024). In addition a performance fee of \$18,640 (\$474,550 in 2024) was accrued for 2025. This was payable due to the portfolio of the company outperforming the S&P ASX 300 Accumulated Index by a small sum.
4. Interests of Mr Murray were paid \$159,840 by Imperial Pacific Limited during 2025.
5. The company has a Remuneration Committee in operation.

Note 21. Related parties

Directors

The names of persons who were Directors of London City Equities Limited at any time during the financial year were Mr P.E.J.Murray, Mr D.G.Butel and Mr L.J.Joseph. Each of these parties were directors of associated company, Imperial Pacific Limited and its group companies during the year, including the subsidiary Imperial Pacific Asset Management Pty Ltd, the manager of London City's Portfolio.

Remuneration

Information on remuneration of directors is disclosed in Note 17.

Other related parties

Aggregate amounts included in the determination of operating profit before income tax that resulted from transactions with other related parties, predominantly its associate Imperial Pacific Limited.:

Associated Entity - Imperial Pacific Limited Group	2025	2024
- Management Fee Payable (Basic)	(255,903)	(207,141)
- Management Fee Payable (Performance)	(18,640)	(474,550)
Amounts payable at balance date (to) by Imperial Pacific Ltd Group	(73,001)	(120,024)

Note 22. Economic dependency

The main trading activity of the company during the year was investment in equities, property and cash deposits. From time to time a significant strategic investment may be made which could influence its economic dependency. London City Equities owns 1.1% of the equity capital of Fiducian Group Limited, a financial services company and 9.2% of Excelsior Capital Limited, predominantly a cash box with a unit trust hedge type investments. Accordingly, London City has some dependency on the financial services and hedge type investment product sector. It has indirect dependence on interest rate levels.

Note 23. Events occurring after balance date

An Ordinary and Special Dividend totalling 2.5 Cents per share has been proposed for payment in October 2025. This has not been provided for in the financial statements. Since balance date the value of the investment portfolio has improved modestly. In broad and unaudited terms Directors estimate that net assets have risen in the order of \$700,000 after potential tax..

LOGO: The emblem of London City Equities Limited represents the London Plane Tree. This plant, initially recorded in 1670, has become a long term survivor of the English seasons and population growth. Its resilience comes from its hardwood strength and its ability to shed bark, thereby renewing and protecting itself from risk of disease. Its shiny leaves are easily washed and reinvigorated by the rain. There are many examples still growing vigorously in London Squares that are estimated to be over 200 years old.
