

SUSTAINABLE CREDIT ACTIVE ETF

Janus Henderson
INVESTORS

As at July 2025

Fund objective

The Fund seeks to achieve a total return before fees that exceeds the total return of the Benchmark by 0.75% p.a. over rolling three year periods.

Sustainability objective

The Fund seeks to invest in credit securities which the Manager expects currently or will in the future contribute positively towards eight 'People' and/or 'Planet' themes.

Investment approach

The Manager utilises a proprietary 'Holistic' framework combining qualitative ESG assessments with third-party ESG measures and metrics to assess issuers; a process then complemented by active stewardship and engagement activities.

Fund Performance

The Janus Henderson Sustainable Credit Active ETF (Fund) returned 0.34% (net) and 0.39% (gross) outperforming the Bloomberg AusBond Composite 0-5Yr Index (Benchmark) in July, which returned 0.06% on the month.

The Fund delivered 0.39% (gross) for July with positive contributions from income carry and capital gains from credit spread compression, which was partially offset by interest rate duration as bond yields rose. Excess returns versus the Benchmark were generated via income advantage complimented by positive selection across credit, in particular corporate subordinated debt. Interest rate duration was retained neutral versus the Benchmark as market pricing for RBA easing remains fairly priced.

Allocations to bank and corporate credit outperformed via carry advantage and capital gains from spreads narrowing, with minimal primary supply during July and investor appetite for high quality credit remaining very strong. We anticipate supply will ramp up post reporting season through August and into September and we have retained some liquidity in anticipation. One new security added to the portfolio was a social bond from IFC where proceeds are exclusively used to finance projects that address social issues, with a cross-cutting focus on vulnerable and/or underserved populations, such as women, low-income populations, underserved communities, refugees and displaced persons.

The Sustainable Credit Fund has a dual mandate; a sustainability objective and a performance objective. Each company within the portfolio has gone through our credit approval process, which includes negative screens, credit analysis and a sustainability assessment using our proprietary holistic ESG framework. In conjunction with normal portfolio construction practices, securities are chosen for their alignment with sustainable themes as well as their return potential for investors. These themes include 'Planet' (decarbonisation, circular economy, sustainable buildings, biodiversity) and 'People' (equality and alleviating poverty, inclusion and social diversity, aid disability support, affordable housing).

The Fund invests in a diversified and sustainable allocation of securities with at least 80% exposure to securities deemed 'Sustainable' and/or 'Impact' in our assessment, and has between 75-85% allocated to investment grade credit.

Markets reduced the amount of RBA easing expected, modestly, to a total of 81bps by the RBA, post the July meeting surprise.

Market Review

Global economic fragmentation persisted, with markets awaiting tangible data. Tariff clarity remained elusive. Key legislation and deals signalled higher rates, while the Fed held firm, seeking further slowdown evidence amid political pressure.

As investors largely dismissed tariff noise credit markets advanced steadily, buoyed by solid fundamentals and optimism for reported corporate earnings. The Australian iTraxx Index ended 6bps tighter at 68bps, while the Australian fixed and floating credit indices returned +0.26% and +0.43% respectively.

Higher yielding credit sectors found further support in the environment, emerging market sovereigns led gains rising 1.1% while US loans rose 0.8%. Domestically, Tier 2 securities had another strong month rising 0.9% with ASX listed hybrids continued to lag their higher ranking equivalents only rising 0.6%.

Market Outlook

Markets reduced the amount of RBA easing expected, modestly, to a total of 81bps by the RBA, post the July meeting surprise.

Our base case for the RBA to ease a further 100bps to 2.85%. Our low case reflects a weaker economic outcome and the RBA easing by a total of 250bps. We allocate a modest weight to the low case. Duration remains neutral, as we see better market opportunities elsewhere. We remain vigilant through the volatility to take advantage of mispricing.

In recognition of the increasingly complex investment environment, our credit strategy remains skewed towards high-quality, investment grade issuers operating in defensive sectors, with resilient business models, solid earnings power and conservative balance sheets. Conversely, we are avoiding economically-sensitive, lower credit quality and leveraged corporate and consumer sectors where default stress remains elevated. Credit spreads and all-in yields particularly in low/no default-risk Australian Investment Grade credit remain reasonably attractive versus global credit. We maintain our constructive view that high quality Australian credit will remain resilient through a range of macro-economic environments, and are well-invested across client portfolios. Notwithstanding, we have prudently elected to continue to hold onto material levels of credit protection, while also maintaining dry powder to take advantage of likely periods of elevated volatility in the future.

ESG Commentary

Labelled bond issuance in July continued. A green securitised bond from Fleet partners started early in the month was followed by sustainable bonds from Standard Chartered Bank and South American Supranational Fondo Financiero para el Desarrollo de la Cuenca del Plata.

The Australian Fixed interest team published a themed piece on the 'circular economy' which can be viewed here <https://www.janushenderson.com/en-au/adviser/article/advancing-sustainability-through-a-circular-economy/>

As at June Quarter 2025**Labelled bonds# structure breakdown**

	Fund
Sustainability-linked	7%
Sustainability	8%
Social	8%
Green	41%

Labelled bonds include use of proceeds bonds such as green, social and sustainability bonds which fund projects with specific and dedicated environmental and/or social benefits and sustainability-linked bonds that do not finance particular projects but rather have their coupons linked to the issuers reaching predetermined sustainability performance targets and key performance indicators. Percentages may not add up to 100% as the breakdown only considers labelled bond investments in the fund.
