

ASX ANNOUNCEMENT

26 AUGUST 2025

Investor webinar – CHM CDH17 deep dive with Professor Jennifer Eads

Sydney, Australia – 26 August 2025 – Chimeric Therapeutics Limited (ASX:CHM), a clinical-stage cell therapy company advancing a pipeline of novel CAR T cell therapies, is pleased to announce that it will hold a webinar featuring the Principal Investigator of its CHM CDH17 Phase 1/2 clinical trial, Professor Jennifer Eads.

Professor Eads is from the lead site for the trial, University of Pennsylvania, and will be joined by Chimeric's CEO Dr Rebecca McQualter and CMO Dr Jason Litten to discuss in detail the Company's first-in-class CAR T, being studied in gastrointestinal and neuroendocrine tumours.

When: 10am AEST, Tuesday 9 September 2025

Register at: https://us02web.zoom.us/webinar/register/WN_vOKQ090QQLuizotxSh3dQg

Upon registering attendees will receive an email containing information about joining the webinar. A recording will be available at the above link soon after the conclusion of the live session, with the replay to also be made available via Chimeric's website and social media channels.

Questions can be sent in advance of the webinar to matt@nwrcommunications.com.au

ABOUT CHIMERIC THERAPEUTICS

Chimeric Therapeutics, a clinical stage cell therapy company is focused on bringing the promise of cell therapy to life for more patients with cancer.

To bring that promise to life for more patients, Chimeric's world class team of cell therapy pioneers is focused on the discovery, development, and commercialization of the most innovative and promising cell therapies.

Chimeric currently has a diversified portfolio that includes first in class autologous CAR T cell therapies and best in class allogeneic NK cell therapies. Chimeric assets are being developed across multiple different disease areas in oncology with 4 clinical stage programs.

CHM CDH17 is a first-in-class, 3rd generation CDH17 CAR T invented at the world-renowned cell therapy centre, the University of Pennsylvania (Penn) in the laboratory of Dr. Xianxin Hua, Professor in the Department of Cancer Biology in the Abramson Family Cancer Research Institute at Penn. Preclinical evidence for CDH17 CAR T was published by Dr. Hua and his colleagues in 2022 in Nature Cancer demonstrating complete eradication of tumours in 7 types of cancer in

mice. CHM CDH17 is currently being studied in a phase 1/2 clinical trial in gastrointestinal and neuroendocrine tumours that was initiated in 2024.

CHM CORE-NK is a potentially best-in-class, clinically validated NK cell platform. Data from the complete phase 1A clinical trial was published in March 2022, demonstrating safety and efficacy in blood cancers and solid tumours. Based on the promising activity signal demonstrated in that trial, two additional Phase 1B clinical trials investigating CORE-NK in combination regimens have been initiated.

CHM CLTX is a novel CAR T therapy developed for the treatment of patients with solid tumours. CLTX CAR T is in a phase 1B clinical trial in recurrent / progressive glioblastoma. Positive preliminary data from the investigator-initiated phase 1A trial in glioblastoma was announced in October 2023.

Authorised on behalf of the Chimeric Therapeutics board of directors by Chairman Paul Hopper.
