## ASX Announcement

27 August 2025

### Placement to raise \$15 million

The Directors of Savannah Goldfields Limited (ASX:SVG) (**Savannah** or the **Company**) are pleased to announce that Savannah has received firm commitments for a share placement of 1.0 billion new fully paid ordinary shares in the Company (**New Shares**) at an issue price of 1.5 cents per New Share (**Offer Price**) to raise A\$15.0 million (**Placement**).

### Highlights

- Placement to raise A\$15.0 million, well supported by high-quality new investors and existing shareholders including entities associated with the Chairman, Stephen Bizzell (participation of \$0.6 million) and major shareholder, Mr Wes Maas (participation of \$2.1 million).
- Placement comprises Tranche 1 of A\$4.1 million to be placed under the Company's existing placement capacity under ASX Listing Rules 7.1 and 7.1A and Tranche 2 of A\$10.9 million subject to shareholder approval at an Extraordinary General Meeting (EGM).
- The Placement substantially improves the Company's balance sheet and provides funding for its immediate goals to:
  - Fully repay its senior secured debt; and
  - Recommence gold production at the Georgetown Gold Processing Plant (GGPP) later this year from mining at the Big Reef deposit and existing stockpiles; and
  - Undertake the planned 80 hole drill exploration programme during remainder of this year to test the priority Exploration Targets in the Georgetown Area that represent potential extensions of the Mineral Resources at Big Reef, Electric Light and Red Dam.
- In addition to the near term gold production underpinned by the Company's existing gold Mineral Resource, the Company will also focus on advancing the considerable exploration potential of its project portfolio with the immediate exploration activities to include:
  - Big Reef
    - RC drilling programme designed to test approximately 1,500 metres of strike extensions of the gold mineralised structures at Big Reef Deposit and the adjacent Big Reef Extended Prospect.
  - Red Dam
    - RC drilling programme designed to explore up to 1,000 metres of strike extension to the gold mineralised structure at the Red Dam Prospect.

- Potential strike extension west of the Red Dam Deposit is planned to be mapped and rock chip sampled at surface.
- Potential has been identified for an additional parallel shear zone to the south and sub parallel to the Red Dam structure and this is planned to be investigated further in this campaign.
- Electric Light
  - RC drilling programme designed to test an additional 300m of the southwest strike extensions to the mineralised structure at the Electric Light Deposit.
- Proceeds from the Placement will also enable Savannah to move forwards towards resumption of mining operations at Agate Creek and processing of Agate Creek ore at the Georgetown processing plant in the first half of 2026.
- The strong demand for the Placement represents a significant endorsement of Savannah's management team and the exploration and development strategy.
- All Directors intend to participate in the Placement with aggregate subscriptions of \$0.78 million (52 million New Shares), subject to shareholder approval being obtained at the EGM.
- Bell Potter Securities Limited and Cygnet Capital Pty Ltd were joint lead managers and bookrunners to the Placement (**JLMs**).
