1. Fund returns are calculated using the net asset value per unit at the start and end of the relevant period in AUD, net of management fees, and assuming all distributions are re-invested. Investors should be aware that past performance is not a reliable indicator of future performance. Returns can be volatile, reflecting rises and falls in the value of underlying investments. 2. % Performance per annum.

3. Since inception returns calculated from November 1, 2018 (Global Equity Fund); October 1, 2021 (Active ETF). 4. The benchmark is the MSCI All Country World Index: NR (MSCI AC World)

Past performance is not a reliable indicator of future performance.

Global Equity Fund performance is the performance of the unlisted class of units and may be a useful reference point for the newer quoted class of units in the Fund. However, you should be aware that the quoted class of units in the Fund has limited performance history. The past performance for the unlisted class of units in the Global Equity Fund is NOT the past performance of the Active ETF.

Any investment that has the possibility for profits also has the possibility of losses, including the loss of principal. There is no guarantee that the investment objective will be realized or that the Fund will generate positive or excess return.

With effect from 14 October 2024, the Loomis Sayles Growth Equity Strategies team took over the investment management responsibility of the Fund. Prior to 14 October 2024, the Fund was managed by the Loomis Sayles Global Equity Opportunities team.
