ASX/Media Release

22 December 2016

Beetaloo extended production test successfully completed

Origin Energy Limited (Origin) today announced the successful completion of an extended production test (EPT) on Amungee NW-1H well. The EPT concludes Origin's 2016 Beetaloo exploration campaign in the Northern Territory.

EPT summary:

- Initial production, as measured over the first 30 days, was 1.16 terajoules per day (TJ/d, equivalent to 1.11 million standard cubic feet or MMscfd)
- 66 TJ (63 MMscf) was produced over 57 days of the EPT, at an average rate of 1.15 TJ/d (1.10 MMscfd)
- The final rate of the EPT was 1.12 TJ/d (1.07 MMscfd)
- Completed safely with no environmental incidents.

A final discovery report is being prepared for the Northern Territory Government's Department of Primary Industry and Resources.

About Origin Energy

Origin Energy (ASX: ORG) is the leading Australian integrated energy company with market leading positions in energy retailing (approximately 4.2 million customer accounts), power generation (approximately 6,000 MW of capacity owned and contracted) and natural gas production (1,204 PJ of 2P reserves and annual production of 75 PJ). Through Australia Pacific LNG, its incorporated joint venture with ConocoPhillips and Sinopec, Origin is developing Australia's biggest CSG to LNG project based on the country's largest 2P CSG reserves base.
