

Oneview Healthcare completes successful ‘Proof of Concept’ with Overland Park Regional Medical Center (“OPRMC”)

January 11th, 2017 – Dublin: Oneview Healthcare PLC (“Oneview”) (ASX:ONE) the Australian-listed Irish healthcare company, today announced the successful completion of a 90-day proof of concept (POC) at Overland Park Regional Medical Center (OPRMC), a comprehensive and state-of-the-art 343-bed hospital located in Overland Park, KS (USA).

The POC took place in a 13-bed medical surgery ward to demonstrate the ability of the Oneview solution to integrate with OPRMC’s existing technologies, including systems for electronic medical record (EMR), admission, discharge and transfer (ADT), orders and documentation, real time location and nurse call. The POC also demonstrated the ability of Oneview’s solution to integrate with OPRMC’s education and entertainment content providers.

The POC further included deployment of Oneview’s proprietary nurse-rounding application to drive an improvement in patient satisfaction scores and nurse rounding compliance across six categories focused on communication, medication education and rounding.

“We understand how important it is for healthcare technology vendors to be able to move the dial in the patient satisfaction space and we are delighted with the early results showing how much the dial has moved in this case,” said James Fitter, CEO of Oneview. “The commitment from the hospital’s nursing and IT leadership was exemplary and a testament to the power of people and technology partnering to deliver meaningful results for patients.”
