

Barnes Jewish HealthCare, Largest Integrated Healthcare System in Missouri, Selects Oneview Healthcare for Interactive Patient Engagement Solution

February 13, 2017: Oneview Healthcare PLC ("Oneview") (ASX:ONE) the Australian-listed Irish healthcare company, today announced an agreement with BJC HealthCare ("BJC") in St Louis, Missouri, to deploy its market leading patient engagement solution at their new BJH Hospital Tower and St. Louis Children's Hospital.

This announcement follows the earlier signing of an enterprise agreement in December, 2016, following which BJC conducted an interactive patient experience proof of concept program consisting of 36 Oneview devices at its existing children's hospital. Based on the success of the pilot, BJC has now committed to deploy 2,000 Oneview devices at their hospitals over the next three years starting with the new 274-bed, Barnes Jewish Hospital Tower due to open in August, 2017.

"It's been a privilege working with such a prestigious organization as BJC," said James Fitter, CEO of Oneview. "As one of the country's leading healthcare systems, BJC is demonstrating their commitment to not only improving the patient experience, but also the experience of their staff with the deployment of Oneview. We look forward to a long and productive relationship, including helping them achieve quantifiable improvements in outcomes, satisfaction and cost savings."

Oneview's interactive patient care solution seamlessly integrates a hospital's IT systems onto one high-performance technology platform. It combines clinical data from EMR vendors such as Epic, Cerner and Meditech, with data from systems providing nurse call, alert management, building management, real-time location services and more to enable hospitals to improve patient engagement, clinical workflows and communication.

About Oneview Healthcare

Oneview Healthcare's innovative Patient Engagement and Clinical Workflow Solution seamlessly integrates a hospital's IT systems onto one high-performance technology platform. It provides point-of-care access to those systems through a variety of end-user devices, including bedside terminal, TV, tablet and smart phone. Through its services and applications, which include treatment education for patients, entertainment and interactive patient care services, Oneview enables hospitals to optimize patient engagement, clinical outcomes and workflow efficiencies. Oneview is revolutionizing the patient experience helping providers to achieve quantifiable improvements across key performance areas such as improved HCAHPS ratings, reduced readmissions and improved clinical outcomes. Established in 2007, Oneview has offices in the U.S., Ireland, and Australia. For more information on Oneview Healthcare, please
