

ASX release

14 February 2017

## **Tax refund**

AtCor Medical (ASX: ACG), AtCor Medical Holdings Limited (ASX:ACG), the developer and marketer of SphygmoCor® for advanced hypertension management, announced today that the company has received a refund from the Australian Tax Office under the R&D tax incentive program of \$472,133.

### **About AtCor Medical**

AtCor Medical develops and markets products for the early detection of target organ damage and management of cardiovascular and renal disease. Its technology allows researchers and clinicians to noninvasively measure the central arterial pressure waveform, central aortic pressures and pulse wave velocity. Central arterial pressure waveform analysis, as measured by the company's SphygmoCor system, provides clinicians with better prognostic and diagnostic information to determine the need for and type of interventions, effects which cannot be detected with standard brachial blood pressure measurements. SphygmoCor is essential for hypertension management.

More than 4,000 SphygmoCor® systems are currently in use worldwide at major medical institutions, research institutions and in various clinical trials with leading pharmaceutical companies. The company's technology has been featured in over 1,000 peer-reviewed studies published in leading medical journals and thousands of citations. AtCor Medical has operations in Australia, the United States, and Europe. For further information, please visit our web site at [www.atcormedical.com](http://www.atcormedical.com).
