

Oneview Announces Technology Development Collaboration with Intel in Rapidly-Expanding Patient Engagement Market

*Relationship will focus on expansion of solutions to improve experience among acute,
elder care and community care environments*

February 15, 2017 – Chicago, IL: Oneview Healthcare PLC (“Oneview”) (ASX:ONE) the Australian-listed Irish healthcare company, today announced a technology development collaboration agreement with Intel focused on accelerating time-to-market patient experience solutions and services.

As government policies shift towards reimbursing healthcare providers for patient outcomes versus procedure or fee-based care, the opportunity for patient engagement solutions will grow dramatically. Well-documented data proves the positive correlation between enhanced patient engagement and improved outcomes and decreased costs associated with delivering healthcare.¹

Oneview and Intel are seeking to develop a long-term roadmap of joint solutions that utilize our respective technologies to deliver best-in-class patient engagement solutions and customer experiences across acute, elder care and community care environments. The collaboration could include utilizing Intel's products, technologies and investments focused on edge and mobile compute, sensing, data-center compute portfolio for advanced analytics and artificial intelligence, network, storage, wearable compute, security and other development tools, along with engineering resources.

“We are very excited about the prospects for this collaboration which will enable us to expand and accelerate the development of new patient engagement solutions,” commented James Fitter, CEO of Oneview. “This in turn will enable healthcare providers across the continuum of care to better achieve their goals using best-of-breed technologies.”

About Oneview Healthcare

Oneview Healthcare’s innovative Patient Engagement and Clinical Workflow Solution seamlessly integrates a hospital’s IT systems onto one high-performance technology platform. It provides point-of-care access to those systems through a variety of end-user devices, including bedside terminal, TV, tablet and smart phone. Through its services and applications, which include treatment education for patients, entertainment and interactive patient care services, Oneview enables hospitals to optimize patient engagement, clinical outcomes and workflow efficiencies. Oneview is revolutionizing the patient experience helping providers to achieve quantifiable improvements across key performance areas such as improved HCAHPS ratings, reduced readmissions and improved clinical outcomes. Established in 2007, Oneview has offices in the U.S., Ireland, Australia and Asia.
