

Wins Further Road Lighting Contracts

16 November 2016, Melbourne: Traffic Technologies Limited (TTI or the Company) is pleased to announce that it has been awarded the following additional lighting contracts to the value of over \$820,000.

- **City to Tullamarine Widening, Victoria.**
- **Darlington Upgrade, South Australia**

These contacts involve the supply of approximately 800 LED Road Lights and a Central Management System, which is a state-of the-art control system for the monitoring and controlling of road lights, including energy metering. The associated energy savings from the control system, when combined with LED road lights, are expected to be approximately 60-70%.

The contract awarded by Lend Lease Engineering is for the supply of LED road lights for the "City to Tullamarine" Freeway Upgrade Project in Victoria. The Tullamarine Freeway connects Melbourne CBD with Melbourne Airport and is one of the major road projects in Victoria at present. The award of this contract represents a further important milestone in the commercialisation of the Company's LED road light following its installation on the Monash and Calder Freeways in Victoria last year.

The contract awarded by the Gateway South Joint Venture is for the supply of LED road lights along with a Central Management System for the Darlington Upgrade Project in South Australia. The Darlington Upgrade Project is another important stage in the delivery of Adelaide's North-South Corridor and will deliver an upgrade of approximately 3.3 kilometres of the existing Main South Road.

These contracts are in addition to the supply contracts awarded to the Company by power companies in New South Wales and Victoria for the supply of LED street lights announced earlier this year.

Commenting on these contracts, Managing Director, Con Liosatos said: "The award of these contracts is significant because it confirms the Company as a leading supplier of LED road lights to the Australian market and follows the securing of approvals in a number of States for its LED road lights and the award of contracts to supply LED road lights to State road authorities and power companies."

Should you require any further information please contact Mr. Con Liosatos.
