## ASX ANNOUNCEMENT

### **ViewnVivo - Redefining Preclinical Research Insight**

Optiscan is delighted to announce the official launch of its 2<sup>nd</sup> generation Preclinical Research product; ViewnVivo.

# ViewnVIVO

ViewnVivo is a miniaturised fluorescence endomicroscope platform that brings the next generation of Optiscan's incredible imaging capability and flexibility to Preclinical Research.

Users of ViewnVivo can capture high resolution, real-time in vivo images with submicron detail and view them in stunning quality for faster Preclinical Research insights.

ViewnVivo represents a significant improvement to the existing competitor's product offering in the research market providing major benefits including:

- Stunning image quality
- Interactive and continuously variable imaging depth control
- Greater sensitivity for even better image capture
- Validated capability
- Miniaturised without sacrificing image resolution
- Real-time In Vivo insight
- Flexibility of operation
- No dedicated technician or facility required
- Self-calibration and simplicity ensures immediate usability
- Patented technology
- Acceleration of research capability

Andrew Froude, General Manager - Preclinical Research Products has commenced the process of sales generation via:

- The existing customer base of previous preclinical models;
- Sales leads and enquiries for this product;
- Pursuing established distribution channels (including MR Solutions); and
- Developing new sales channels and direct sales

ViewnVivo is now through the final stages of product testing and, subject to final regulatory approval, we anticipate the first installations of ViewnVivo to take place in the 2<sup>nd</sup> quarter of the 2017 calendar year.

Optiscan is confident that ViewnVivo will secure a significant share of the applicable global Preclinical Research products market and has the potential to make a positive contribution towards Optiscan's earnings following the installation timings referred to above.

Further details on ViewnVivo can be found on the dedicated website: [www.viewnvivo.com](http://www.viewnvivo.com) or by contacting the personnel listed below.

## About Optiscan

Optiscan is an Australian company that has developed and patented miniaturised confocal microscopes, and is a global leader in the development and application of microscopic imaging and related technologies for medical markets.

A handwritten signature in blue ink, appearing to read "Archie Fraser".
