ASX Announcement – MICRO-X LIMITED (ASX: MX1)

Nano Commercialisation Update: ISO 13485 Accreditation

Micro-X Limited (ASX: MX1) is pleased to advise that it has successfully passed the documentation review which was a follow-up to the full ISO 13485 Stage Two Audit undertaken in mid-January. The auditor, BSI, has now recommended Micro-X for accreditation and the formal issue of the ISO 13485 accreditation certificate is expected within 6 weeks.

This is a major milestone in Micro-X's development as it confirms that the company has established and is operating at its Tonsley facility a comprehensive Quality Management System for the design and manufacture of medical devices. Compliance with ISO 13485 is a material deliverable to achieve compliance with the EU Medical Device Directive.

Micro-X's ultra-lightweight mobile X-Ray unit, the 'DRX Revolution Nano' was recently featured very successfully by Carestream Health at two important trade shows as part of the early marketing awareness campaign for the product. The very positive reactions from industry and clinical visitors to Arab Health in Dubai and the European Congress of Radiology in Vienna have confirmed strong interest in the Nano in these markets.
