FFT finalises million-dollar security contract for Middle East Airport

Future Fibre Technologies Limited (FFT) (ASX: FFT), a global leader in fibre optic perimeter intrusion detection systems, has finalised an order valued at US\$900K (A\$1.176K).

FFT Aura will be used to protect the perimeter of a major international airport located in the Middle East.

This order, which forms part guidance advised in FFT's market announcement dated 23 January 2017, has secured all necessary export clearances and will be shipped in the coming weeks.

With airport perimeter security breaches an ongoing issue in many countries, FFT Chief Executive Rob Broomfield said that the Company was pleased to build on its previous success in securing international airport contracts across Europe and the Middle East.

About FFT

FFT is a leading developer and manufacturer of fibre optic intrusion detection security systems. Deployed by some of the most security conscious industrial, military and government organisations in the world, FFT's advanced security systems:

- detect and locate **perimeter** intrusions;
- identify third-party interference on oil and gas **pipelines**; and
- protect sensitive **data network** communications cables.

With hundreds of installations in more than 60 countries, FFT has established a solid reputation for delivering highly intelligent, reliable, and award winning intrusion detection solutions. www.fftsecurity.com
