FFT finalises Oil & Gas perimeter security contract in Eastern Europe

Future Fibre Technologies Limited (FFT) (ASX: FFT), a global leader in fibre optic perimeter intrusion detection systems, has finalised an order valued at US\$462K (A\$560K).

FFT Secure Fence will be used to protect two sites at an Oil & Gas facility located in Eastern Europe.

This order, which forms part of guidance advised in FFT's market announcement dated 23 January 2017, has now secured all necessary export clearances and will be shipped in the coming weeks.

FFT Chief Executive Rob Broomfield said that this contract was another example of an existing customer extending its use of FFT perimeter security solutions to new sites around the globe.

About FFT

FFT is a leading developer and manufacturer of fibre optic intrusion detection security systems. Deployed by some of the most security conscious industrial, military and government organisations in the world, FFT's advanced security systems:

- detect and locate **perimeter** intrusions;
- identify third-party interference on oil and gas **pipelines**; and
- protect sensitive **data network** communications cables.

With hundreds of installations in more than 60 countries, FFT has established a solid reputation for delivering highly intelligent, reliable, and award winning intrusion detection solutions. www.fftsecurity.com
