ANZ BANK EXPANDS ITS USE OF KNOSYS FURTHER THROUGHOUT ITS BUSINESS OPERATIONS

Knosys Limited (ASX: KNO) ("Knosys") is pleased to announce that its major customer in the Banking industry, ANZ Bank, has elected to implement the Knosys Platform in a knowledge management expansion across its business units. The new order for \$34,000 is for an initial two-month licence period commencing on 1 May 2017 and ending on 30 June 2017, the annual licence renewal date under the existing agreement. Upon annual renewal of the licence arrangement from 1 July 2017, this additional order will contribute a further \$200,000 per annum to group revenues.

Knosys Chief Executive Officer, John Thompson, said that this expansion further reflects the confidence that this major customer has in the company's capacity to deliver a superior knowledge management technology that brings real benefits to its workforce and business units. The web based architecture of the solution enables its rapid setup and deployment across the business units.

"This extension builds on our longstanding relationship which dates back almost 8 years" he said.

"We plan to work with this and other customers in 2017 to continue to improve our product's capabilities and performance. We have some exciting developments planned for this year to enable more knowledge based solutions to become mainstream in many organisations."

"As a company, our capacity to maintain long term relationships with major customers remains a key plank in our growth strategy." Mr Thompson said. "We intend to become the premier Australian company assisting medium and large organisations build smarter, faster, more efficient workforces through performance-based knowledge management solutions."

ABOUT KNOSYS

The Knosys Platform is an enterprise-grade, knowledge management solution that enables companies to better capture, manage and access information across often disparate business units, divisions and information technology (IT) platforms. Knosys augments a company's IT platforms, by virtualizing both internal and external information repositories without the need to disrupt existing processes or force migration of data.

The Knosys knowledge management platform provides an open and expandable framework, which can extend into a fully integrated digital workcentre, becoming the window into a company's applications environment. It becomes the #1 used app a day in the life of an information worker and drives productivity and optimizes processes by incorporating process wizards, decision guidance, collaboration & feedback and UI veneers to integrated systems.
