FFT receives contract for major South East Asian telco

- **Perimeter protection contract for FFT Secure Fence valued at A\$426K**
- **Additional software and services order following deployment valued at a further A\$100K**
- **Opportunity for FFT solutions to be deployed at other sites for same customer**

Future Fibre Technologies Limited (FFT) (ASX: FFT), a global leader in fibre optic perimeter intrusion detection systems, has secured a perimeter protection contract valued at A\$426K.

FFT Secure Fence will be used to protect telecommunications infrastructure at several small critical telco sites in South East Asia, with an additional software and services order for the project to follow in 1QFY18 valued at approximately A\$100K.

Commenting on the announcement, FFT Chief Executive Rob Broomfield said, *“FFT’s comprehensive range of fibre optic solutions, strong capability for networking multiple sites, and flexibility for monitoring options is proving key to securing complex infrastructure projects across multiple sites. This is common to both the utility and telco sectors. In relation to this specific project, the successful installation of our perimeter security systems on similar infrastructure in the region factored positively in the customer’s decision to award FFT the contract.”*

Additional infrastructure owned by the same customer is expected to require similar security upgrades to over 20 additional sites during the next 18 months.

About FFT

FFT is a leading developer and manufacturer of fibre optic intrusion detection security systems. Deployed by some of the most security conscious industrial, military and government organisations in the world, FFT’s advanced security systems:

- detect and locate **perimeter** intrusions;
- identify third-party interference on oil and gas **pipelines**; and
- protect sensitive **data network** communications cables.

With hundreds of installations in more than 60 countries, FFT has established a solid reputation for delivering highly intelligent, reliable, and award winning intrusion detection solutions. www.fftsecurity.com
