Resumption of Sol Plaatje Project Underway

West Wits Mining Limited (ASX : WWI) (“the Company” or “West Wits”) is pleased to announce the resumption of operations at the Sol Plaatje Project (“SPP”) which is located within the Soweto Cluster Gold Project, Johannesburg, South Africa.

The Company deployed an excavator mounted rock breaker (“eccentric ripper”) mid last week to commence excavation of hard rock. The rest of the fleet has been progressively mobilised and full production is now underway.

The assessment of contract processing alternatives for ore is continuing and it is expected that a decision will be made within the next several days. West Wits is delighted with the quality of proposals it has received and options it now has with respect to processing SPP ore.

Michael Quinert executive Chairman commented “We are thrilled to see operations in full swing again at SPP. We now have a much heightened level of control and involvement in SPP and have great confidence in the capability of the team to deliver on the mine plan which calls for a build up to 15,000 tonnes of ore per month. We expect ore to be flowing within the next two weeks for processing and sale.”

West Wits is also continuing its discussions with Mintails regarding the finalisation of amounts due to it from the previous operations at SPP. The Company recently received a further \$50,000 payment reducing the outstanding claim. West Wits hopes to finalise a settlement shortly.
