## JCT wins \$649,000 Tender with Renewal SA

Xped Limited (**ASX: XPE**) (“Xped” or “the Company”) is pleased to announce that their subsidiary JCT Healthcare (“JCT”) has been successful in winning a \$649,000 tender with Renewal SA.

The tender is for the supply, installation, and support of assistive technology services to approximately 30 properties to be constructed by Renewal SA.

JCTs smart support technology solution will be utilised by people living with a disability. The technology implemented will include monitoring and control of lights, door locks, air conditioning, shutters, blinds, power switches, cupboards, temperature sensors and smoke detectors. The solution will be integrated with front door cameras and intercom solution to allow for remote viewing and 2-way voice communication. Some of the JCT Smart health technologies being implemented include activity and agitation detection, fall detection, and wireless panic buttons.

JCTs cloud based NuCams software and next generation mobile App are also part of the solution and their integration with the smart device technologies was critical in winning the tender. JCT expects to complete delivery of this project in 1st half 2018.

JCT is continuing to pursue other tender opportunities across Australia with these similar technology solutions. The JCT smart support technology solution offers a professional smart health solution that can be implemented in both new build sites as well as retrofitted to existing dwellings. The solution provides independence to the tenant and their family, while still allowing the support worker to provide the support required.

Xped has invested significantly in the development of these JCT technologies over the past 12 months. The Board is pleased with this result and believes this market segment is a terrific opportunity for revenue growth.

By Order of The Board
