

# Business Update – September Quarter Appendix 4C

**MELBOURNE Australia October 26, 2017:** Imugene Limited (ASX: IMU), an immuno-oncology company is pleased to release its Appendix 4C for the quarter ended 30<sup>th</sup> September, 2017. During the quarter, the Company has:

## Highlights:

- Imugene ended September 2017 with cash reserves of AU\$5.32 million.
- First Phase Ib/2 study patients dosed for our lead compound HER-Vaxx in gastric cancer;
- Confirmed full and final ethics committee and regulatory approvals;
- Continued patient recruitment at clinical study sites in Asia;
- Secured further intellectual property for immuno-oncology platform technology;
- Advanced development of next generation of therapy targets and pipeline.

Imugene Chief Executive Officer Leslie Chong said, "The Company remains focused on supporting the current clinical program now underway while expediting the development of new oncology candidates based on our promising technology platform."

"We continue to keep a close eye on all costs and manage our resources prudently. We anticipate a natural increase in expenditures as the current study expands and we work to secure additional rights and patents for our valuable immuno-oncology platform. The Executive team is supported by significant and consistent support from the Board."

## About Imugene (ASX:IMU)

Imugene (ASX:IMU) is a clinical stage immuno-oncology company headquartered in Melbourne, Australia. Its lead product is HER-Vaxx, a B Cell peptide vaccine for the treatment of gastric cancer. The company is also developing mimotope-based immunotherapies against validated and new oncology targets.

HER-Vaxx is a cancer immunotherapy designed to treat tumours that over-express the HER-2/neu receptor, such as gastric, breast, ovarian, lung and pancreatic cancers. Developed by leading scientists at the Medical University of Vienna in Austria, the peptide vaccine is constructed from several B Cell epitopes of HER-2/neu. It has been shown in pre-clinical studies and in one Phase I study to stimulate a potent polyclonal antibody response to HER-2/neu, a well-known and validated cancer target.

Imugene in partnership with the Medical University of Vienna is working to discover and develop mimotope-based immunotherapies against validated and new oncology targets. This partnership has the potential to create game-changing B Cell peptide vaccines that would replace or augment conventional monoclonal antibody therapies.

#### Notes

- 1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
