Sentara Healthcare Selects Mach7 for Data Migration Project

Highlights

- **Mach7 sign deals with Sentara for US$1.8m for data migration project**
- **Over 20 million images to be migrated to Mach7 VNA**
- **Sentara is a valued existing customer using Mach7 VNA and workflow solutions**

Melbourne, Australia; 17 November 2017: Mach7 Technologies Limited (**Mach7** or the **Company**) (ASX:M7T) today announced Sentara Healthcare has selected Mach7 to handle data migration for their enterprise image management modernization initiative.

Sentara Healthcare (Sentara) signed a deal worth US$1.8m to manage a data migration of over 20 million imaging studies to Mach7's Vendor Neutral Archive (VNA) storage solution. Sentara needed a solution that could consolidate all its imaging data across 4 healthcare regions. The Mach7 managed migration will consolidate more than 20 million images to its centralised Mach7 VNA as part of this project.

Trent Conwell of Sentara said: "We were looking to standardize and centrailize our imaging infrastructure and Mach7 was the best choice to assist us with this project. Mach7 will manage this large data migration, not only transferring the data, but also cleansing the data and automatically normalising it to local standards." Conwell added "We like the control and visibility that we'll have with the migration including a reporting and real-time dashboard to give us real-time updates on progress. With Mach7, we'll have the ability to control the migration schedule so that network traffic is not impacted during times of high need."

Mike Jackman, Mach7 CEO commented: "We're thrilled to expand our relationship with Sentara. They are market thought leaders in defining the next generation of enterprise imaging. This large migration will continue to demonstrate the power of Mach7's Healthcare Data Services platform."

Sentara is a large healthcare organization based in Norfolk, VA providing healthcare for over 2 million residents across Virginia and north-eastern North Carolina. Sentara has been a customer of Mach7 since early 2014 and is a frequent host of Mach7's prospective customers who want to see a successful live Mach7 VNA implementation.

About Mach7 Technologies:

Mach7 Technologies (ASX:M7T) develops innovative enterprise imaging IT solutions that create a clear and complete view of the patient to inform diagnosis, reduce care delivery delays and costs, and improve patient outcomes. Mach7's award-winning enterprise imaging platform provides a vendor neutral foundation for unstructured data consolidation and communication to power interoperability and enables healthcare enterprises to build their best-of-breed clinical ecosystems. Mach7's sophisticated workflow tools, advanced clinical viewing and optimized vendor neutral archiving solutions unlock silos of legacy systems empowering healthcare providers to own, access and share patient data without boundaries.
