* The Chairman voted undirected proxies in his control in favour of all resolutions.

** Resolution 1 and 4 were special resolutions and received the necessary 75% approval to be passed.

On behalf of the Board;

Peter Vaughan
Company Secretary and CFO

About Titomic:

Titomic (ASX:TTT) is headquartered in Melbourne, Australia. The company overcomes the limitations of previous additive manufacturing (3D printing) for metals to manufacture complex parts without shape and size constraints. Titomic offers design and manufacturing methods to enable speed-to-market, superior products at lower production costs and using less resources for a more sustainable future.

Titomic additive manufacturing machines that can customise build size to customer requirements offer additive manufacturing advantages at industrial scale. Multiple robots can be utilised to build larger parts, competing with traditional manufacturing

solutions for industries such as aerospace and defence, sporting goods, medical, automotive, industrial equipment, construction and marine. Other benefits of the Titomic Kinetic Fusion technology include:

- Joining dissimilar metals for enhanced mechanical performance properties in a structure
- Stronger structures without welding, folding or bending
- Reduced time to market; faster manufacturing time
- More efficient use of energy and resources; lower production costs

Clients will be offered a licence to manufacture via the Titomic Kinetic Fusion technology. Titomic's revenue model will also provide clients with R&D prototyping services, Titomic equipment sales, powder and consumables supply, equipment service and maintenance.

FORWARD-LOOKING STATEMENTS:

Certain statements made in this release are forward-looking statements and are based on Immuron's current expectations, estimates and projections. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," "estimates," "guidance" and similar expressions are intended to identify forward-looking statements. Although Immuron believes the forward-looking statements are based on reasonable assumptions, they are subject to certain risks and uncertainties, some of which are beyond Immuron's control, including those risks or uncertainties inherent in the process of both developing and commercialising technology. As a result, actual results could materially differ from those expressed or forecasted in the forward-looking statements. The forward-looking statements made in this release relate only to events as of the date on which the statements are made. Immuron will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this release except as required by law or by any appropriate regulatory authority.
