ASX ANNOUNCEMENT

First sale of Senetas Ultra-High-Speed 100Gbps Ethernet Encryptor - Update

Senetas Corporation Limited ("Senetas") announced today that it had secured the first sale of its ultra-high-speed 100Gbps Ethernet encryptors, the CN9000 Series. Gemalto, Senetas' major distribution partner, effected the sale to a government customer in Western Europe. In accordance with the distribution agreement with Gemalto, Senetas has invoiced Gemalto for the sale and it will be reimbursed for the sale directly by Gemalto.

About Senetas Corporation Limited

Senetas, an Australian public listed company (ASX:SEN), is a leading developer of data encryption solutions for enterprise, government and technology service providers. From certified high-assurance encryption hardware and virtualised encryption, to the most secure file sharing application providing data sovereignty control, all Senetas solutions are based on the same leading security, high performance and crypto-agile platform.

Senetas encryption solutions leverage state-of-the-art encryption key management and crypto-agility by design, providing long-term data protection in a post-Quantum computing world. They share the same designed-in data protection without compromising network and application performance or user experience.

Senetas CN Series, certified high-assurance encryption hardware, provide maximum data protection for core Ethernet network infrastructure. A preferred option for government, enterprise, defence and communications service providers, Senetas CN Series encryptors are certified by independent testing authorities (Common Criteria, FIPS and NATO) as "suitable for government and defence use".

Senetas CV Series virtual encryptors provide robust data protection for high-scale extended and virtualised networks. The CV Series provides security benefits of virtualised encryption's rapid scalability and flexibility; delivering cost-effective deployment to meet changing business and IT needs.

SureDrop delivers a state-of-the-art encrypted file sharing, collaboration and synchronisation solution. It is the most secure file sharing application available and uniquely ensures customers' total control over data location and sovereignty. Whilst maximising users' experience, SureDrop leverages the Senetas encryption platform.

Senetas encryptors have been trusted to protect much of the world's most sensitive information for nearly 20 years. They are used to protect everything from government and defence data and secrets, to intellectual property and business data, to financial transactions, CCTV networks, SCADA critical infrastructure control systems and citizen identity.

Senetas encryption solutions are used in more than 35 countries. They are distributed and supported internationally by Gemalto, the world's largest data security company, with its SafeNet Identity and Data Protection products.
