About Abilene Oil and Gas Limited

Abilene Oil and Gas Limited is a Mid-West USA focused production, development and exploration company. The company assets are located in Kansas. The company strategy is focused on building up oil production assets, increasing drilling locations and adding exploration acreage in the region. The company strategy is based on a combination of targeting high return projects and innovative funding while maintaining low overhead and corporate costs.

Highlights:

- **Exploration at the Company's CKU Project continued with promising operating results considering world oil prices**
- **Distribution of CKU profits during 3rd quarter of FY18**

Abilene Oil and Gas Limited ('Abilene' or 'the Company') provides the following quarterly activities report for the quarter ended 31 December 2017.

Klick Oil Project

(49.2% Working Interest – 40% Net Revenue Interest)

Operator – CMX Inc. (CMX) is the operator of the project

- Klick East Oil Field
- Located in Woods County, Oklahoma USA (ABL 49.2% WI)

The Klick East Oil Field is located in Section 22 of T29N-R14W, Woods County, Oklahoma, which is in the middle of a vast oil and gas-producing province being the Northern Shelf of the Anadarko Basin.

The Northern Shelf Area is bounded by the Pratt Anticline to the northeast and the Southern Oklahoma fold belt to the southwest. The Anadarko Basin is a large Paleozoic basin with a long history of oil and gas production. Klick East Oil Field comprises 320 acres.

JV Partners

- CMX Inc. (49.2% Working Interest – 40% Net Revenue Interest)
- Chesapeake Energy Corp (Minority participating interest of 1.6%)
- Other parties with over-riding royalty interests amount to 18.7%.

Klick Oil Project (Cont'd)

During the prior quarter, the joint venture operator notified the Company that the Klick #1-22 well was shut down. The equipment will be either sold or utilised for new/existing wells to reduce further capital expenditure. The joint venture partner will rehabilitate the well site where required. The Joint Venture partner has advised that well shut down is still yet to finalised and that minor expenses are still been incurred in order to finalise the process.

Gross oil and gas revenue and associated lease operating costs (including taxes) for the joint venture production for the quarter, including ABL's share, were as follows:

Joint Venture		ABL Share	
Gross Revenue	Nil	Revenue	Nil
Gross Expenses	US \$3,721	Expenses	US \$1,831

The Company (together with its joint operation partner CMX) will provide further updates when available.

Welch-Bornholdt Wherry Project

(ABL 50% Working Interest)

Operator – CMX Inc. (CMX) is the operator of the project

- Welch-Bornholdt Wherry Oil Fields
- Rice and McPherson Counties, Kansas USA

The Welch-Bornholdt and Wherry Oil Fields are located in Rice and McPherson Counties, Kansas, United States, approximately 140 miles from the Klick East Oil Field in Oklahoma.

The Welch-Bornholdt and Wherry Oil Fields are mature, developed and mostly abandoned crude oil accumulation. Approximately 1,400 vertical wells have been drilled over more than 60 years on the fields, and aggregate production totals 46 million barrels of mainly high quality sweet crude oil.

The Company and its joint operation partner CMX have established a large 15,000 acre position in the Welch-Bornholdt and Wherry Oil Fields. This acreage covers a significant contingent resource, mainly in the Mississippian age cherty carbonate rock formation that is up to 10 metres thick across the area. Abilene and CMX produce from this Mississippian formation at the Klick Project.

The Welch-Bornholdt and Wherry Oil Fields are uniquely positioned, and benefit from having a refinery at the city of McPherson approximately 30 kilometres by road, which is serviced by trucks and pipelines.

During the prior quarter, the joint venture operator notified the Company that the #1-1 Krehbiel Trust well was shut down. The equipment will be either sold or utilised for new/existing wells to reduce further capital expenditure. The joint venture partner will rehabilitate the well site where required. The Joint Venture partner has advised that well shut down is still yet to finalised and that minor expenses are still been incurred in order to finalise the process.

Gross oil and gas revenue and associated lease operating costs (including taxes) for the joint venture production for the quarter, including ABL's share, were as follows:

Joint Venture		ABL Share	
Gross Revenue	Nil	Revenue	Nil
Gross Expenses	US \$6,358	Expenses	US \$3,179

The joint venture continues to undertake technical evaluations of the surrounding acreage in order to define potential areas of interest and future possible drill locations.

Central Kansas Uplift Appraisal and Development Project (CKU)

(ABL 49% Working Interest)

Operator – CMX Inc. (CMX) is the operator of the project

- Russell, Rice, Ellsworth and Barton Counties, Kansas USA

JV Partners

- CMX (25% WI)
- Cade Production LLC (20.8%)
- Panther Energy, Inc. (2.6%)
- Thomas P. Tenneson (2.6%)

On 21 October 2014, the Company announced that it had entered into definitive agreements to acquire an interest in over 15,600 acres in the area known as the Central Kansas Uplift, made up of 204 separate leases in a number of counties in Kansas. ABL and its partners in the CKU project have established a joint venture entity, Lodestone Resources LLC (Lodestone) which holds the group's interests in the CKU project. Abilene owns 49% of the equity of Lodestone and has one of the three managers (i.e. Directors) of that entity. Lodestone acquired the first land package (5,078 acres) in October 2014, including all rights to the completed 3D seismic. Lodestone paid US\$1,497m to the landowners.

On 9 April 2015, the Company announced that it agreed to fund its share of the second option to acquire further acreage and leases in the Central Kansas Uplift Project ('CKU Project'). Through the second option payment, Lodestone acquired a further 5,178 acres.

On 16 December 2015, the Company announced that it had agreed to fund and exercise the third and final option to acquire further acreage and leases in the Central Kansas Uplift Project ('CKU Project'). Following the acquisition of the third and final option payment, Lodestone acquired a further 5,378 acres.

The CKU project is a low risk exploration and appraisal joint venture in the Central Kansas Uplift area. The project goal is to mature up to an initial 50 drillable locations in the first land package, by shooting 3D seismic in areas adjacent to existing (and mature oil fields). The use of 3D allows the joint venture to recognise smaller drilling targets than can be detected by geologic mapping. The use of 3D seismic is expected to lower the drilling risk.

Below is a summary of the Lodestone wells currently in operation:

Well	County/State	ABL Equity	Status	Exploration Production during quarter [#]
Claflin # 1-35 & # 2-35	Barton County, Kansas	49%	Operating	2,154
Woelk #1 -21	Russell County, Kansas	49%	Operating	826
Woelk #1 -19	Russell County, Kansas	49%	Operating	492
Homolka # 1-35	Barton County, Kansas	14.7%	Operating	318
Claflin #1-34	Barton County, Kansas	49%	Operating	164
Woelk #1-18	Russell County, Kansas	49%	Operating	164
Ames-Robl #1-19	Rice County, Kansas	49%	Operating	162
Bushton #1-36 & # 2-36	Ellsworth County, Kansas	49%	Operating	485
Bushton #1-20	Ellsworth County, Kansas	49%	Operating	1,639
Susank #1-29	Barton County, Kansas	49%	Operating	164
Bushton #1-30	Ellsworth County, Kansas	49%	Operating	325
Susank B #1-5 & #2-5	Barton County, Kansas	49%	Operating	2,627
Leghorn #1-22	Barton County, Kansas	49%	Operating	796
Foghorn #1-27	Rice County, Kansas	49%	Operating	479

[#] All reported operating rates are based on information provided by the operator.

The gross production during the quarter by the joint venture was 10,795 Bbls.

Gross oil revenue and associated lease operating costs (including taxes) of Lodestone's production for the quarter, including ABL's share, were as follows:

Joint Venture		ABL Share	
Gross Revenue	US \$504,834	Revenue	US \$247,369
Gross Expenses*	US \$336,964	Expenses*	US \$165,112

* It is noted that the above results are yet to be audited and it is noted that all cash flows from Lodestone have yet to be received by ABL and remained in Lodestone LLC during the quarter. The Joint Venture partner however advised that it would distribute profits during the FY18 Qtr3 (which was received subsequent to the end of the December 2017 quarter). The revenue included above is gross revenue prior to royalties been deducted. Royalty costs have been included within Gross Expenses.

Pratt County Prospect Joint Venture

Operator – CMX Inc. (CMX) is the operator of the project

- Located in Pratt County, Kansas USA

Joint venture working interest structure (Net revenue interest 80%):

- Abilene – 49%
- CMX – 25%
- Cade Production LLC – 26%

During the September 2015 quarter, Abilene entered into a joint venture agreement in relation to the Pratt County Prospect, which is located in Pratt County, Kansas, T27S, R14W, prospect, and covers approximately 2,560 acres, between the city of Pratt and Greensburg, Kansas in south-central Kansas and includes nine leases. The regional setting is the Anadarko Basin, west of the Pratt Anticline. Local structural anticlines and synclines along with a stratigraphic element provide the trap for hydrocarbon accumulation in numerous carbonate zones and sand reservoirs within the Lansing-Kansas City, Mississippian, Viola and Simpson formations. The prospect is situated amongst known multi-pay pools.

The prospect will target prospective zones based upon the results of 3D seismic carried out by CMX. A nearby excellent "show hole" confirms the presence of hydrocarbons in the Lansing-Kansas City and Ordovician reservoirs and based upon the results of the 3D survey, drilling targets are currently being assessed.

Abilene's share of costs associated with the acquisition of acreage, geology and geophysics work was US \$220,667.

The Joint Venture drilled two wells (Aussie #1-16 and Money Shot #1-21) during June 2016. The joint Venture continues to assess the viability of the Money Shot #1-21 well and therefore the operating future of the well is yet to be determined.

During the prior quarter, the joint venture operator notified the Company that the Aussie #1-16 well was shut down. The equipment will be either sold or utilised for new/existing wells to reduce further capital expenditure. The joint venture partner will rehabilitate the well site where required. The Joint Venture partner has advised that well shut down is still yet to finalised and that minor expenses are still been incurred in order to finalise the process.

The gross production during the quarter by the joint venture was:

Oil: 304 Bbls

Gross oil and gas revenue and associated lease operating costs (including taxes) for the joint venture production for the quarter, including ABL's share, were as follows:

Joint Venture		ABL Share	
Gross Revenue	US \$14,571	Revenue	US \$5,712
Gross Expenses	US \$10,718	Expenses	US \$5,252

Rawlins County Prospect Joint Venture

Operator – CMX Inc. (CMX) is the operator of the project

- Located in Rawlins County, Kansas USA

Joint venture working interest structure (Net revenue interest 80%):

- Abilene – 49%
- CMX – 25%
- Cade Production LLC – 26%

During August 2015, Abilene entered into a joint venture agreement in relation to the Rawlins County Prospect which is located in Rawlins County, Kansas T.1S-R33W, approximately 8 miles north of the town of Atwood in extreme northwest Kansas and covers approximately 800 acres and includes 5 leases. The regional setting is the Anadarko Basin, east of the western flank of the Cambridge Arch (Ancestral Central Kansas Uplift). Locally, the prospect is located within a vast area of cyclic deposition of Lansing-Kansas City sediments on a portion of a broad epeiric shelf. Fluctuations in sea level over the Kansas shelf and variation in terrigenous clastic influx are proposed as the major processes that produced the Lansing-Kansas City alternating sequence of carbonate and clastic sediments representing marine, shoreface, and continental environments. Locally structural anticlines and synclines provide the trap for hydrocarbon accumulation in numerous carbonate zones within the Lansing-Kansas City Super Group.

The prospect is located within the producing confines of the Drift Southeast Pool and within close Proximity Pools productive from the Lansing-Kansas City. The prospect will target prospective zones within the Lansing-Kansas City based upon the results of a large group 3D seismic shoot by locally active Operators. The Company along the joint venture operator are currently reviewing potential drill targets.

Abilene's share of costs associated with the acquisition of acreage, geology and geophysics work was US \$84,250.

The joint venture operator is continuing to review the land package for potential drilling prospects.

Rodinia Resources LLC (Logan County Project)

Operator – CMX Inc. (CMX) is the operator of the project

- Located in Logan County, Kansas USA

Working Interest and ownership structure (Net revenue interest 80%):

- Abilene – 34.3%
- CMX – 17.5%
- Cade Production LLC – 14.56%
- Panther Energy, Inc. – 1.82%
- Thomas P. Tenneson – 1.82%
- Other – 30%

During August 2015, Abilene and its partners in the Logan County Project established a joint venture entity, Rodinia Resources LLC (**Rodinia**), to hold the group's interests in the Logan County Project. Abilene purchased a 49% in Rodinia and has one of the three managers (i.e. Directors) of that entity as a representative of the Company.

During July 2017, the consolidated entity announced that the Logan joint venture (Rodinia Resources LLC) had sold 30% of its interest to third parties, which diluted each partner's interest by 30% for consideration of USD\$200,000, which was used to fund drilling activities. As a result, the consolidated entity now holds a 34.3% interest in the joint venture.

Project Status

The Logan County Prospect is a 9,530 acre wildcat project located in T14S, R36W in Logan County, Kansas, approximately 25 miles east of the town of Sharon Springs in north-western Kansas and includes 35 leases. Regionally, this prospect is located near the north flank of the Hugoton Embayment, which plunges to the southward towards the Anadarko Basin, and the easternmost edge of the Las Animas Arch of eastern Colorado. Throughout the lower Pennsylvanian time, specifically Morrowan age, this was a fluvial-deltaic environment, known for the deposition of incised valley channel sandstones. These have proven to be prolific reservoir west of our prospect area. Additionally, carbonates of Cherokee, Marmaton, and Lansing-Kansas City age are proving to be an excellent reservoir in several new discoveries south, north and east of our prospect acreage. A new Lansing –Kansas City and Marmaton field to the east has produced over 400 MBO in less than 1 year. Many of these new wells was reported completed for in excess of 150 BOPD. These new fields appear to have a geographic distribution of 2-3 square miles and were discovered using 3D seismic evaluation.

Corporate Update

The total number of fully paid ordinary shares on issue as at the date of this report is 397,614,352.

Subsequent to the end of the December 2017 quarter, the Company received a disbursement of profits (post operating and capital outflows) from the Lodestone Resources LLC (CKU Project) Joint Venture amounting to USD\$180,742.65. It is expected that future profits will also be distributed post operating and capital expenditure.

The Company continues to review funding mechanisms to assist with any further drilling expenditure and working capital requirements and will look to fund activities through either capital raisings or further loan arrangements. The Company intends to fund any further exploration and drilling costs for its CKU project through existing cash reserves and future cash flows generated by Lodestone Resources LLC.

Interests in Petroleum Tenements

Below is a listing of the Company's interests in Petroleum tenements as at 31 December 2017:

Petroleum Tenement	Location	Beneficial Percentage held	Interest acquired/farm-in during the quarter	Interest disposed/farm-out during the quarter
Klick East Oil Field	Woods County, Oklahoma, USA	49.2% Working Interest	-	-
Welch-Bornholdt Wherry Oil Fields	Rice and McPherson Counties, Kansas USA	50% Working Interest	-	-
CKU Project	Russell, Rice, Ellsworth and Barton Counties, Kansas USA	49% Working Interest	-	-
Rodinia Project (Logan County Project)	Logan County, Kansas USA	49% Working Interest	-	-
Rawlins County Prospect	Logan County, Kansas USA	49% Working Interest	-	-
Pratt County Prospect	Pratt County, Kansas USA	49% Working Interest	-	-
Harpia Oil Field and Guara Oil Field	Sergipe-Alagoas Basin, on-shore Brazil	40% interest	-	-

Glossary

ABL	- Abilene Oil and Gas Limited
Bbl	- One barrel of crude oil
BOPD	- Barrels of oil per day
Mcf	- Once thousand cubic feet (natural gas volumetric measurement)

Cautionary statement

Abilene advises that all reported average production results are based on reported amounts provided by the operator of the projects. The average production rates cannot yet be determined, as a number of the wells are not flowing continuously and are still been assessed by the joint venture.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
