

Shareholder Update

Indian Partners Australian Visit Dates Confirmed

29 March 2018: Environmental Clean Technologies Limited (ASX: ESI) (ECT or Company) provides the following update in relation to the previously announced proposed visit to Australia by its Indian project partners.

The Company's announcement of 8 March 2018 stated that invitations had been sent to NLC India Limited (NLCIL) and NMDC Limited (NMDC) to visit Australia in late April, early May.

NLCIL and NMDC have now confirmed acceptance of the invitation and, subject to Visa application requirements, intend to arrive in Australia between 29 April and 6 May.

Further updates will be provided in due course.

About ECT

ECT is in the business of commercialising leading-edge energy and resource technologies, which are capable of delivering financial and environmental benefits.

We are focused on advancing a portfolio of technologies, which have significant market potential globally.

ECT's business plan is to pragmatically commercialise these technologies and secure sustainable, profitable income streams through licensing and other commercial mechanisms.

About Coldry

When applied to lignite and some sub-bituminous coals, the Coldry beneficiation process produces a black coal equivalent (BCE) in the form of pellets. Coldry pellets have equal or superior energy value to many black coals and produce lower CO₂ emissions than raw lignite.

About MATMOR

The MATMOR process has the potential to revolutionise primary iron making.

MATMOR is a simple, low cost, low emission production technology, utilising the patented MATMOR retort, which enables the use of cheaper feedstocks to produce primary iron.

About the India R&D Project

The India project is aimed at advancing the Company's Coldry and Matmor technologies to demonstration and pilot scale, respectively, on the path to commercial deployment.

ECT has partnered with NLC India Limited and NMDC Limited to jointly fund and execute the project.

NLC India Limited is India's national lignite authority, largest lignite miner and largest lignite-based electricity generator.

NMDC Limited is India's national iron ore authority.
