Mach7 Technologies to Showcase Solutions at "RadiologyAsia 2018"

Melbourne, Australia; 09 May 2018: Mach7 Technologies Limited (**Mach7** or the **Company**) (ASX:M7T) is pleased to announce our attendance at the RadiologyAsia 2018 Conference and Exhibition from May 11 – 13 at the MAX Atria and Singapore Expo in Booth A03. The show is held in conjunction with the 27th Annual Scientific Meeting of the Singapore Radiological Society and College of Radiologists, Singapore with expected attendance of over 1,000 from Singapore, ASEAN and ANZ.

Mach7's Sage Data Services Platform (the Company's interoperable ecosystem), will be showcased at the event. Sage bridges today's standards and solves technology gaps, whilst enabling telehealth. Sage is proven to deliver improved productivity for radiologists and clinicians, new revenue sources for health systems, improvements in examination turnaround times, reduced number of patient transfers and a decrease in unnecessary duplicate exams.

In addition, the new Mach7 innovative reconstructed PACS offering, with zero footprint (ZFP) diagnostic and clinical solutions, will be available for demonstration for those customers looking to implement a full PACS solution that has the flexibility to expand out of the radiology department and into an enterprise imaging model supporting multi clinical specialties.

Ravi Krishnan, Mach7 Chief Strategy Officer and Founder, noted "We are thrilled to be attending RadiologyAsia. This region is one of our largest markets with growing demand for our interoperable solutions. Our Data Services Platform delivers improved clinical outcomes, leveraging our intelligent clinical contextualization technologies. We look forward to seeing our customers and meeting new prospects while continuing to deliver value to healthcare organisations in ASEAN and ANZ."

About Mach7 Technologies:

Mach7 Technologies (ASX:M7T) develops a secure data services platform, Sage, that improves business, operational and patient outcomes. Sage provides an interoperable foundation to manage patient data and host an ecosystem of apps. Deliver solutions including Picture Archive Communication Systems (PACS), enterprise imaging workflows, vendor neutral archiving (VNA), artificial intelligence (AI), clinical portals and care coordination. Reimagine, redefine, and reconstruct the best solution to connect and exchange health information without boundaries. Work smart with Sage in the cloud or onsite. Visit www.mach7t.com.
