Business Overview

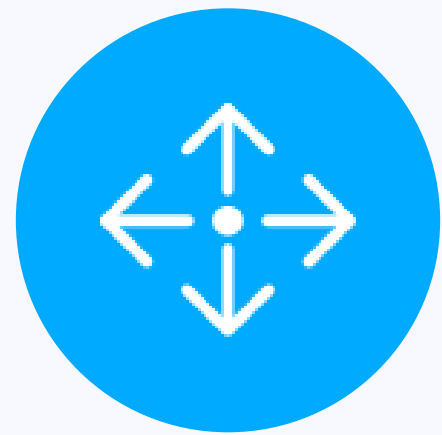

Call Recording Platform as a Service

World's leading and only call recording Platform as a Service for Telecommunications Service Providers.

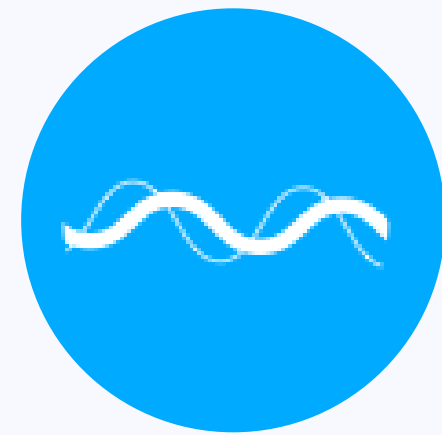

The Dubber platform enables call recording and analytics to be provided by a telecommunications carrier, without any hardware, on a monthly subscription basis as part of a telephony service.

Introduction to Dubber

Scalable

Dubber is a global company with scalable technology and a scalable business model

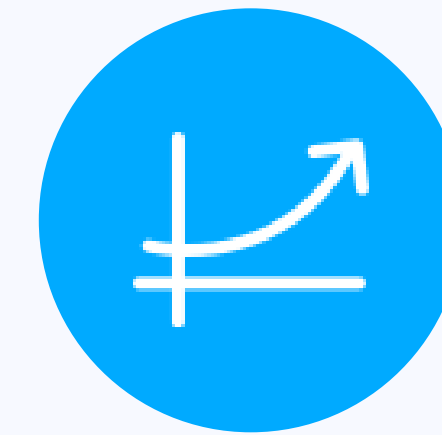

Innovator

Dubber provides call recording for compliance and voice data for AI, analytics and 'big data' applications

Disruptor

Dubber is disrupting a multi-billion-dollar industry

Leader

Dubber is an industry leader, appealing to Enterprise, business and individuals

Essential

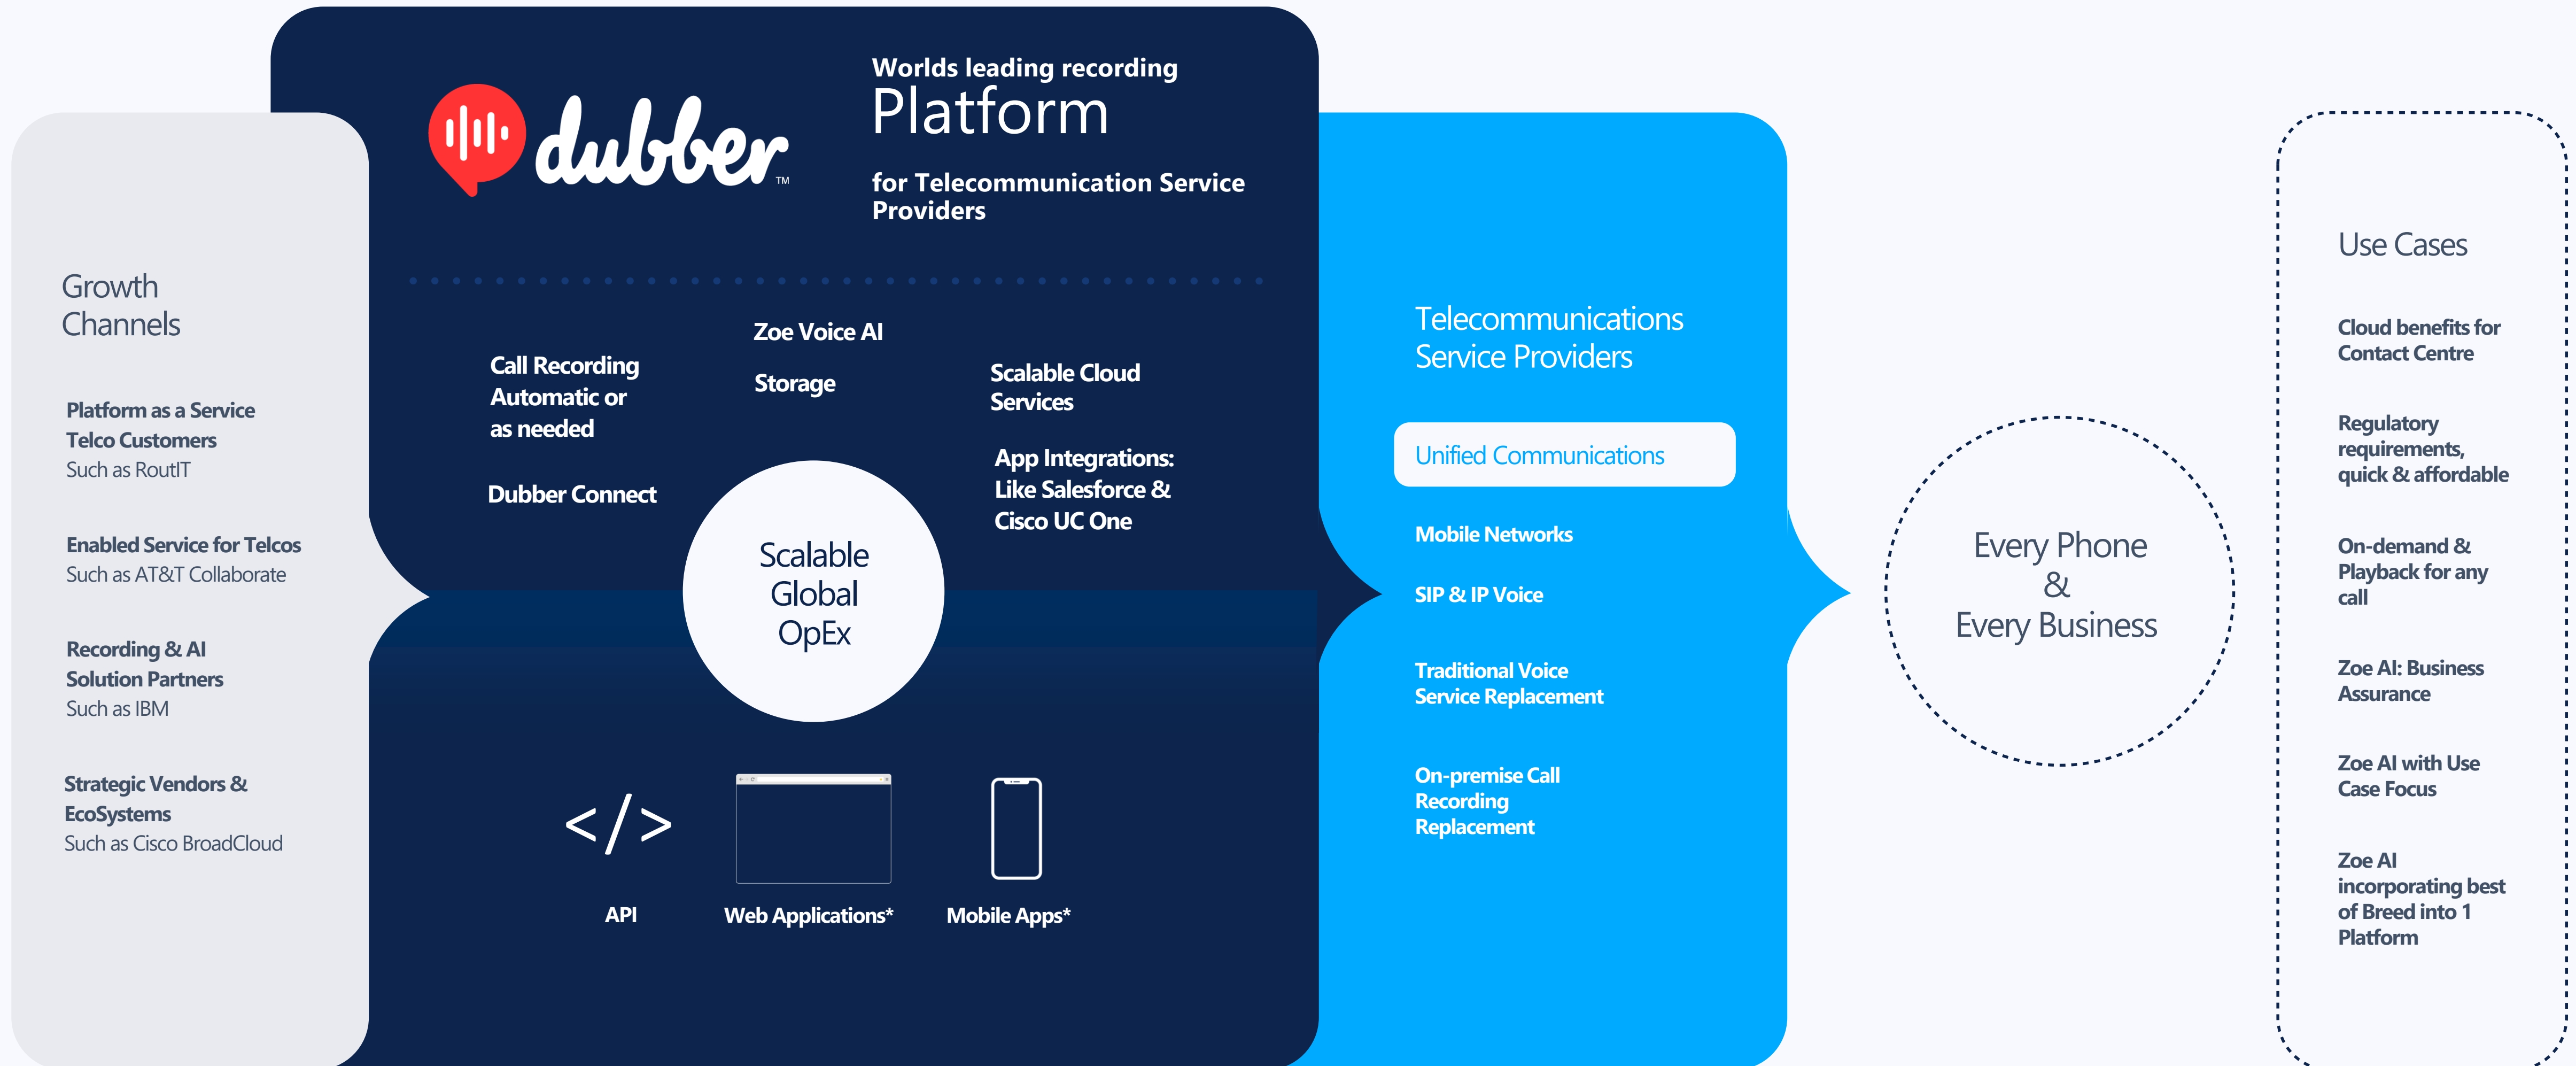

Dubber is an essential service offering for leading global providers

Cloud Call Recording

	Dubber Platform	Traditional Recording
Capacity	Unlimited carrier-level scale to record	Fixed capacity
Storage	Unlimited storage with back-up	Fixed capacity, encouraging users to delete recordings
Pricing	No CapEx	Expensive capital engagements, expensive to expand and maintain
Speed	Agile and rapid deployments	Cumbersome deployment process
Use Case	Any phone and any role in a business can benefit	Enterprise only and limited deployments
Security	All aspects are encrypted, tested and secure	How is data stored and who has access?

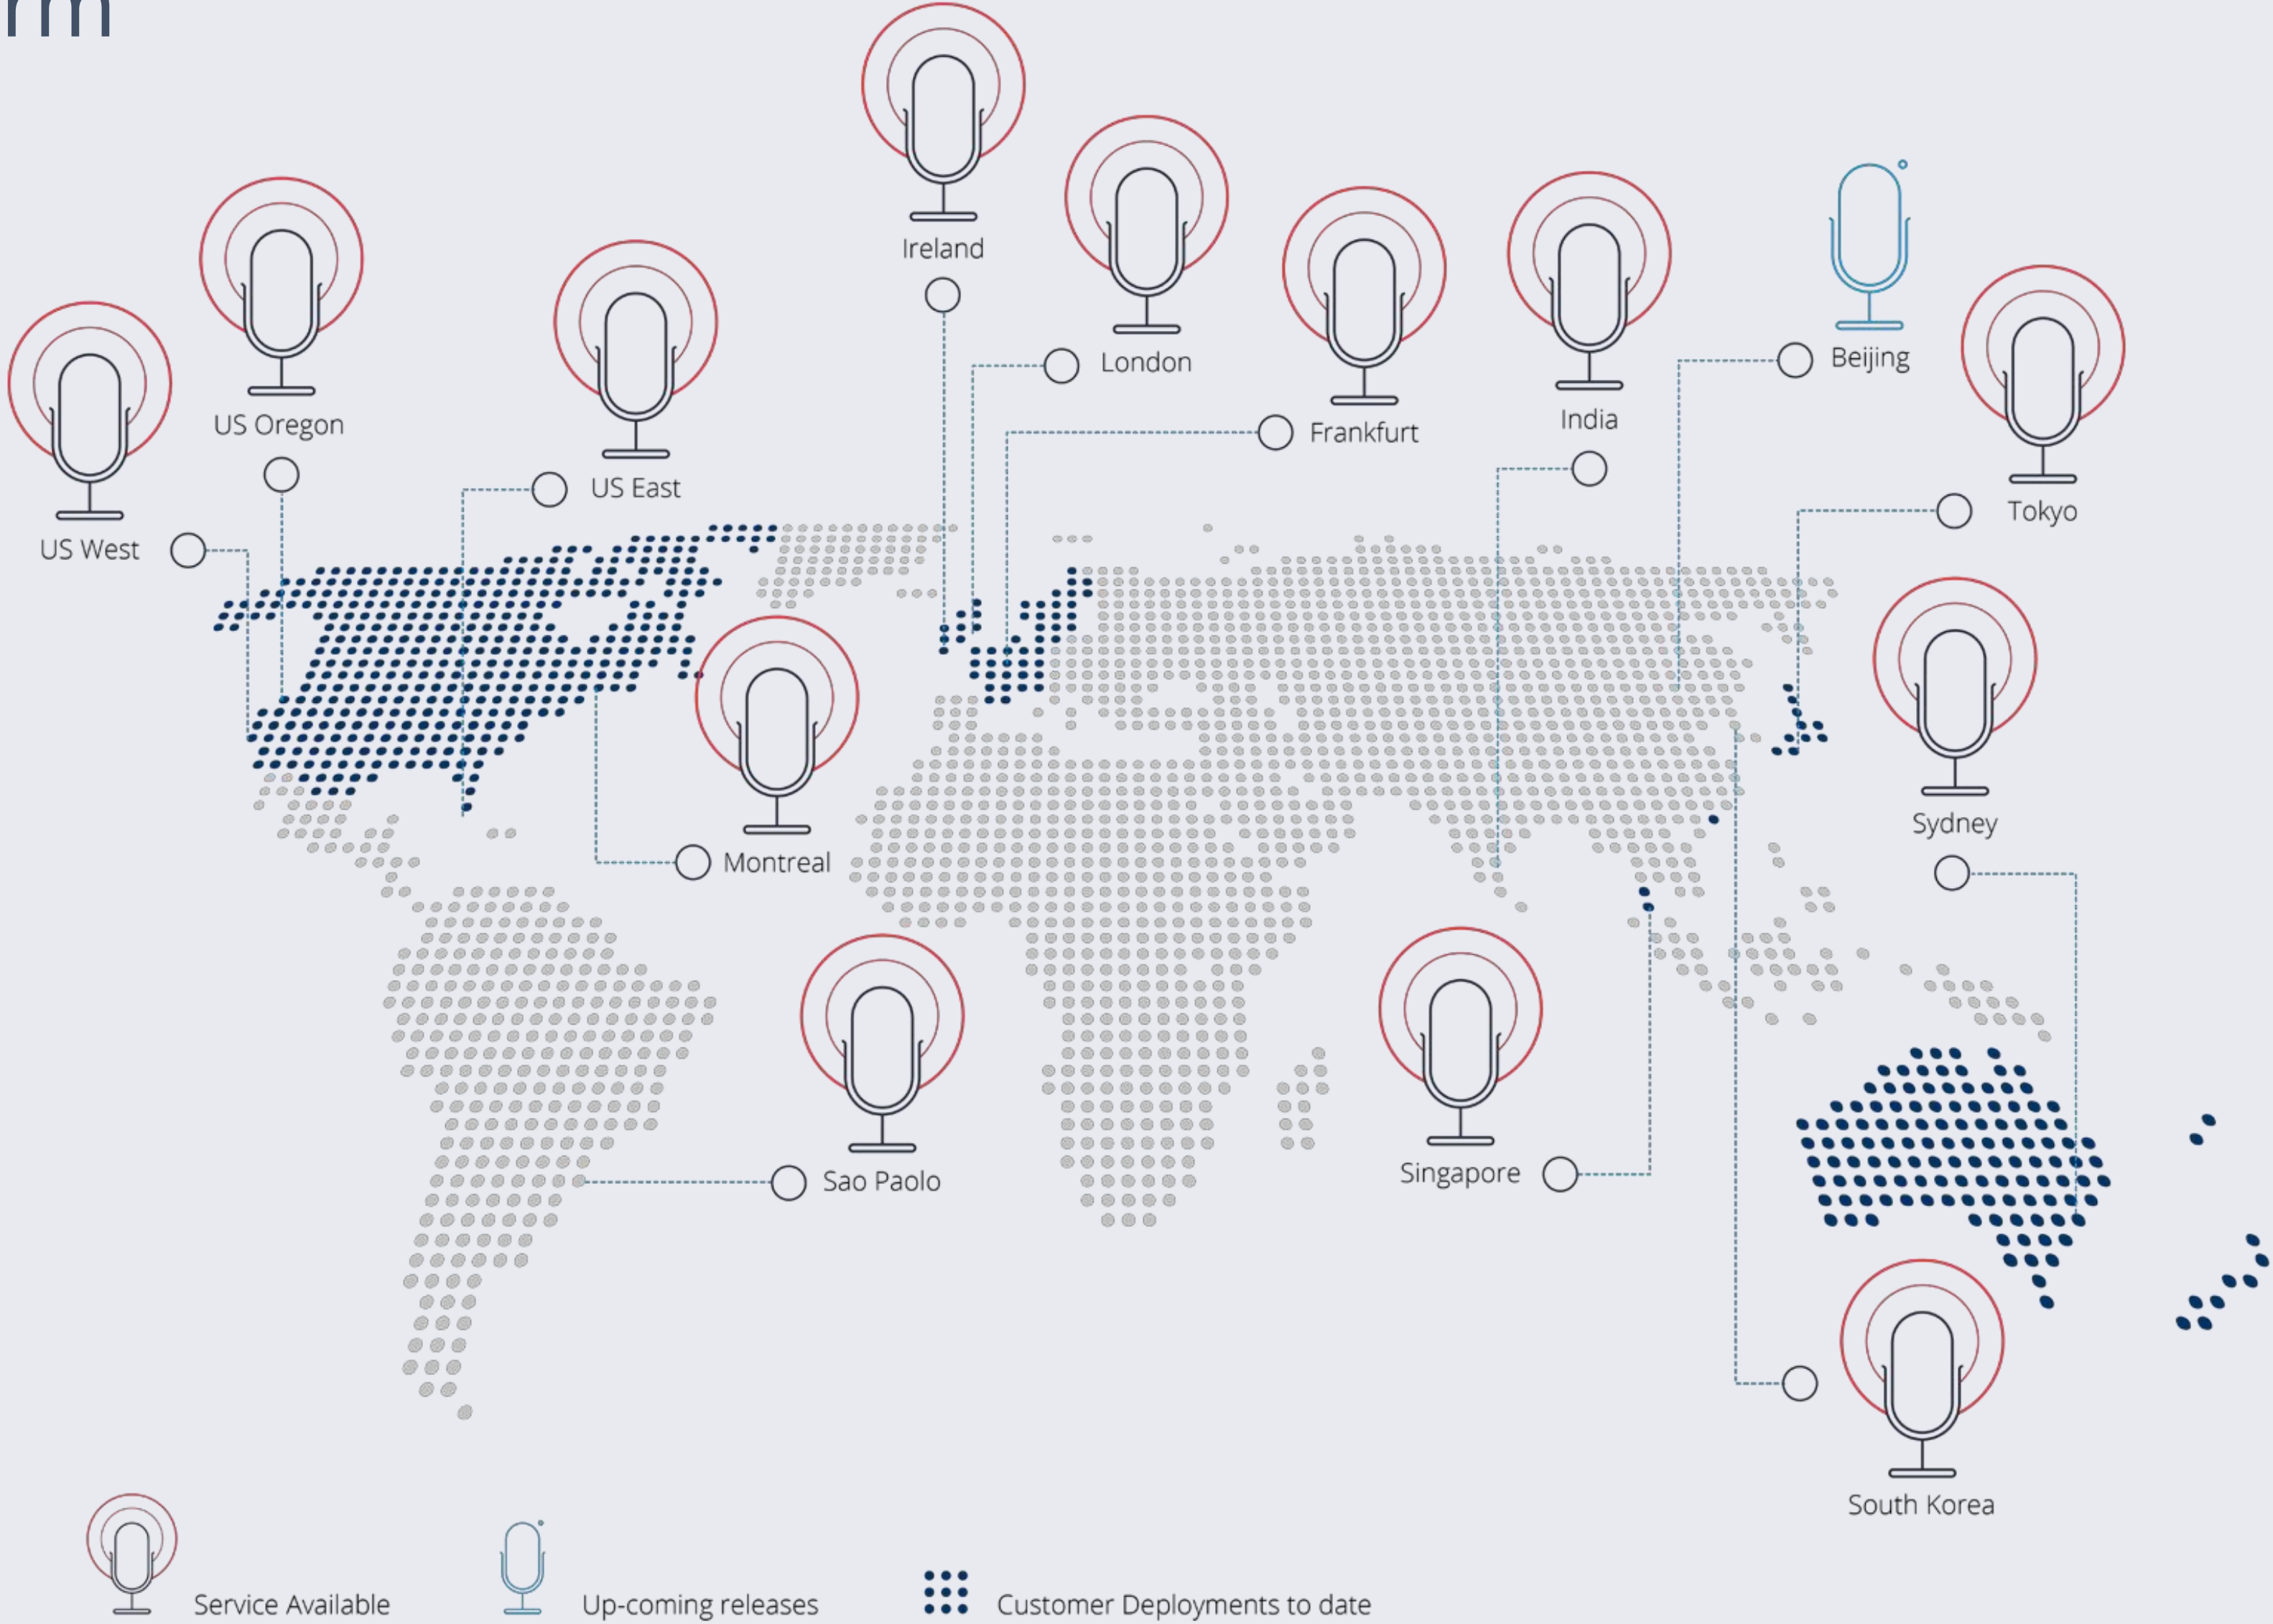

Transforming Call Recording to the cloud

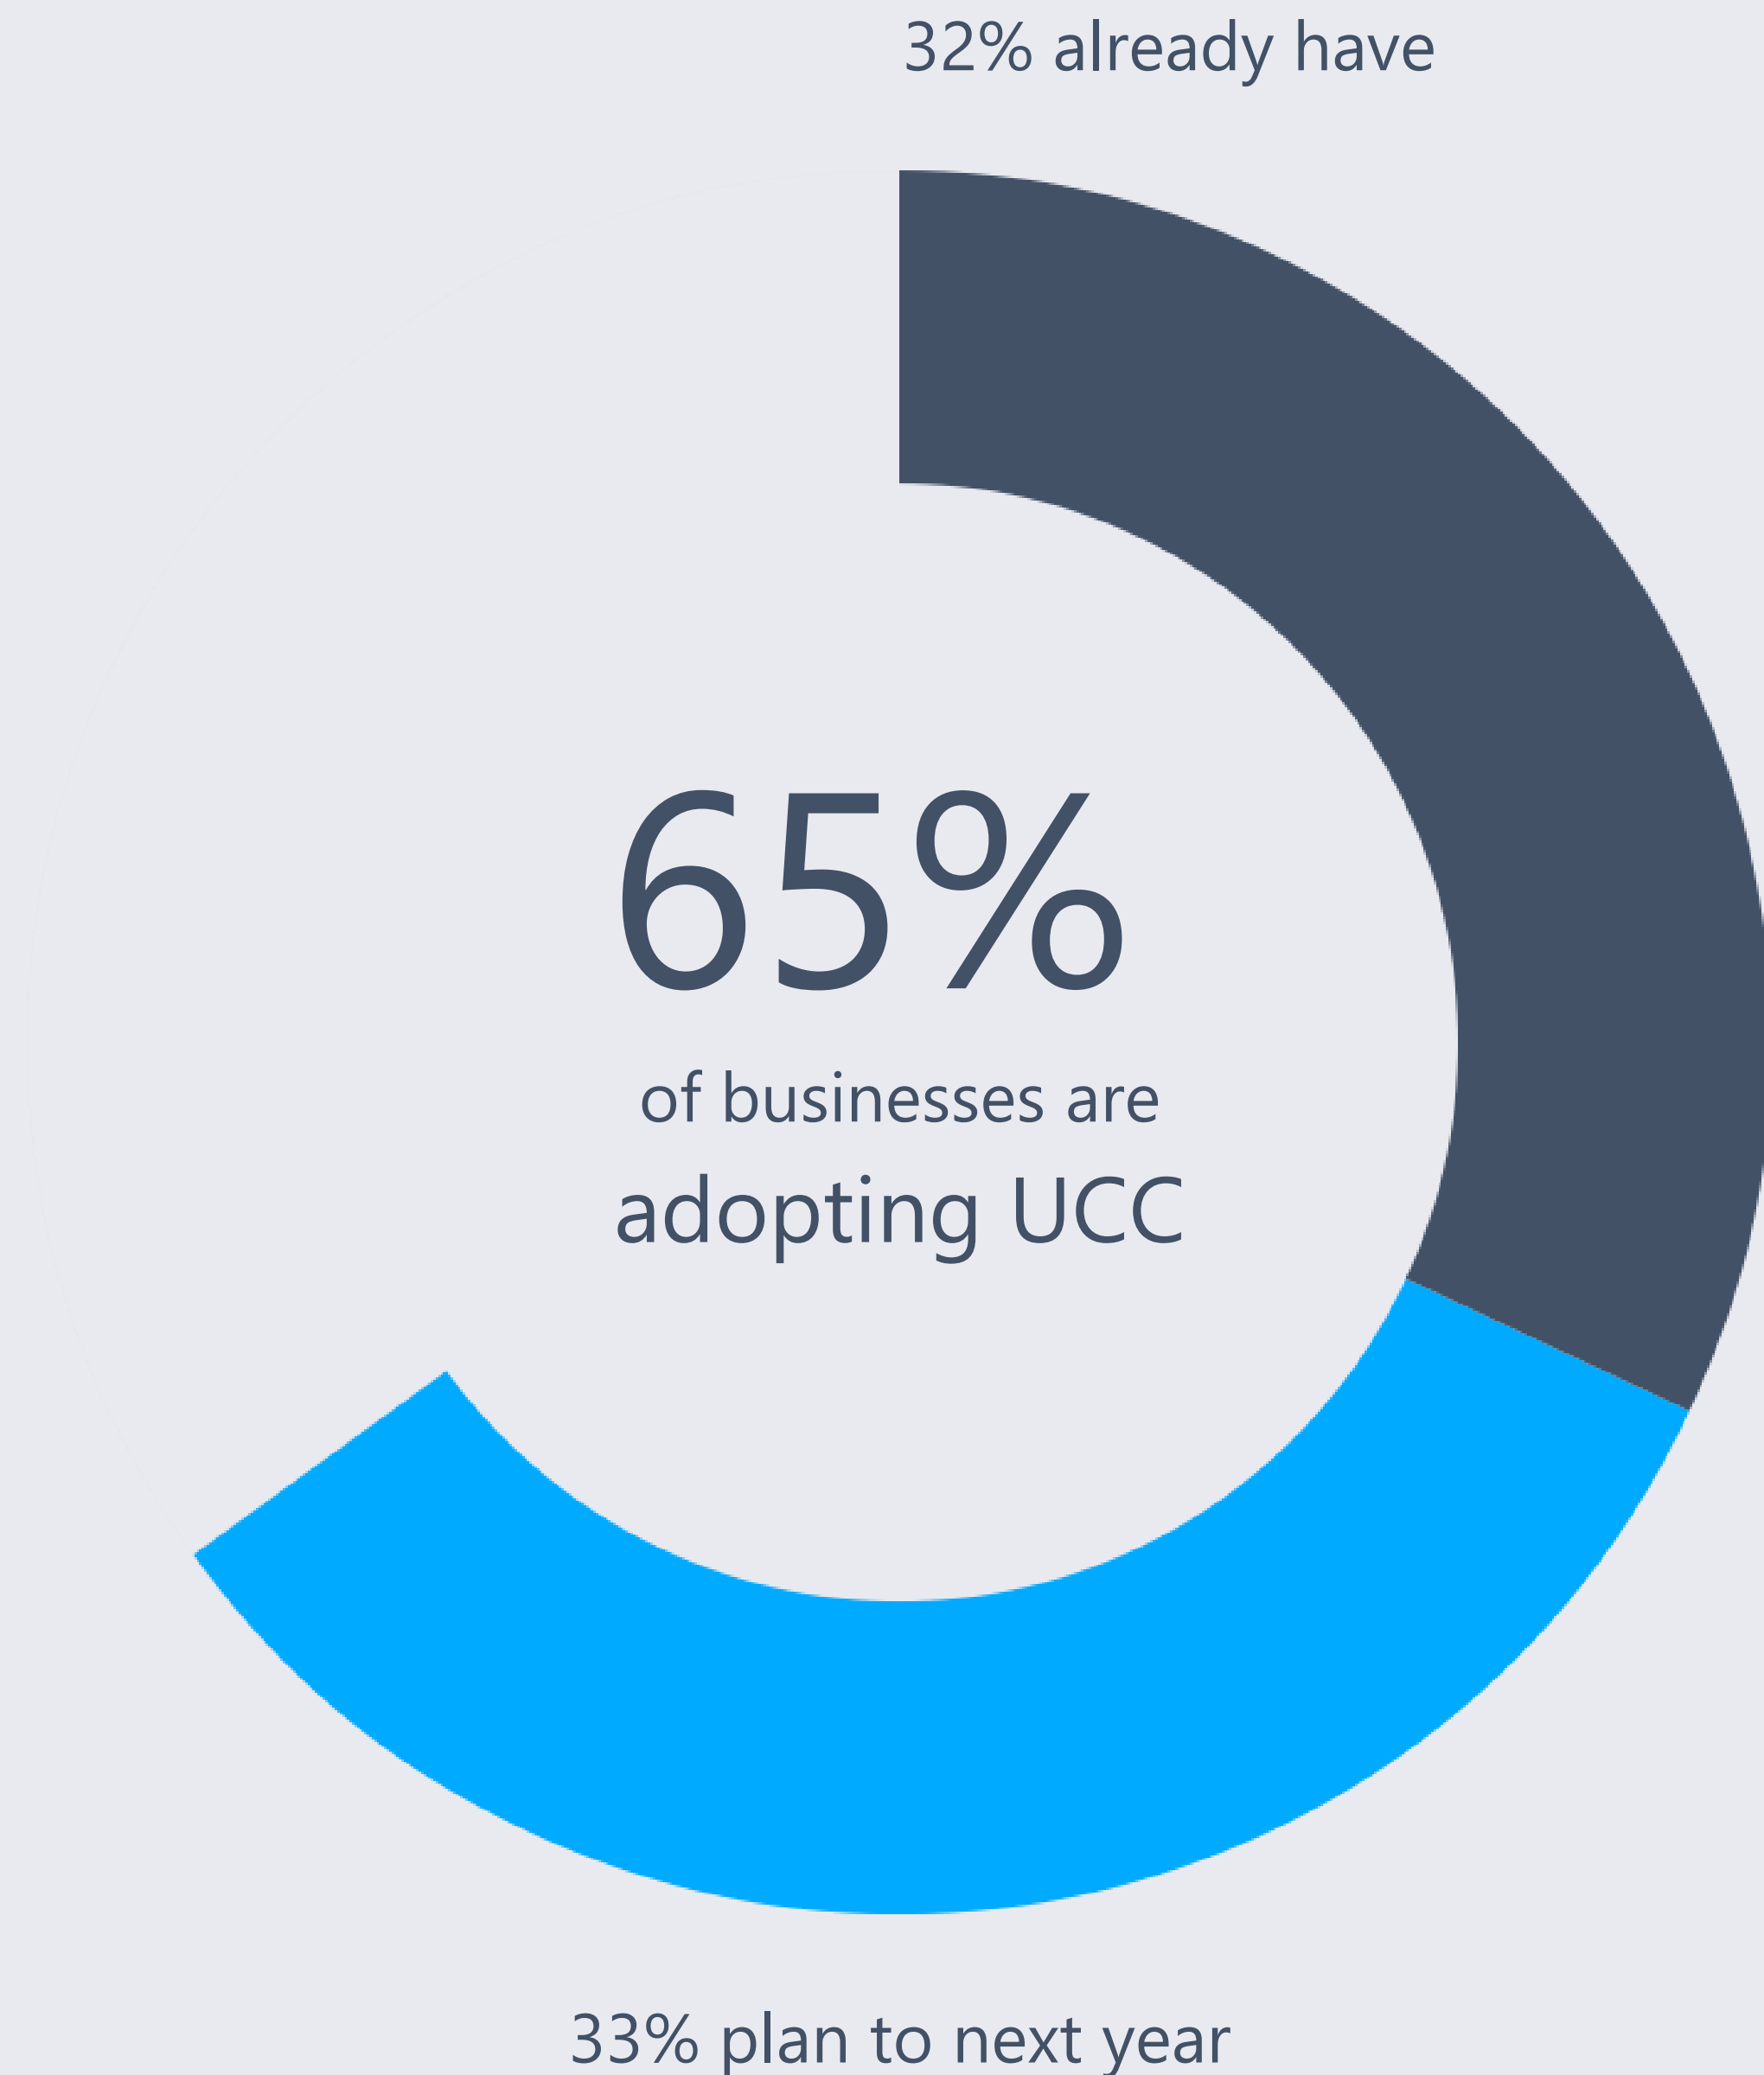

Uniquely, the worlds only call recording Platform as a Service for Telecommunication Service Providers

*Apps are generally branded as the Telco Provider

Global Platform

Unified Communications: Transforming telecommunications to the cloud

Frost & Sullivan research reveals that companies are embracing cloud-based unified communications and collaboration (UCC) services.

A recent Frost & Sullivan survey of almost 2,000 IT decision makers around the world shows that 32% have already deployed UCC tools in the cloud, and another 33% expect to do so in the next year.

Platform of Choice for Global Leaders

- To provide an essential layer for Telecommunications Carrier Network Offerings - **AT&T**
 - Dubber is currently contracted to provide the recording platform for 57 carrier networks globally
- To expand the market for recording – **Cisco BroadCloud**
 - Dubber is the recording service for the world's leading cloud telephony platform **BroadCloud** where recording is a standard telephony feature
- To capture voice data for Insights, sentiment, AI and value added services – **CDK Global**
 - CDK Global are a multi billion \$USD company providing analytics to over **28,000** auto dealerships

Dubber & IBM provide Cognitive Call Solution

The Platform of Choice For:

IBM

Key Investment Considerations

- Telecommunications industry moving to the Cloud; Dubber is the platform of choice for world leaders – e.g. AT&T Collaborate.
- Global service for Cisco BroadCloud – every user enabled for Dubber.
- Growing monthly users and SaaS revenues.
- Big Data analytics growth potential.
- Strong barriers to entry - once on a telco network, unlikely to be removed.
- Changes in financial services regulations driving global growth.
