ASX ANNOUNCEMENT

Senetas Corporation Limited announces first dividend since comprehensive restructure.

Senetas Corporation Ltd (ASX: SEN) (the Company), a leading global developer and manufacturer of multi-certified, defence-grade data encryption solutions, is pleased to announce that the board of directors has declared the Company's first dividend since its comprehensive restructure in 2012.

The Company shall pay a final unfranked dividend for FY2018 of \$0.000462 per share (a cash distribution of approximately \$0.5 million) and a special unfranked dividend of \$0.003237 per share (a cash distribution of approximately \$3.5 million), representing total dividend payments by the Company of \$0.003699 per share representing a total cash distribution to shareholders of approximately \$4 million. The dividends will be paid to shareholders registered on 14 December 2018 and will be paid on 4 January 2019.

In commenting on the announcement CEO Andrew Wilson said: "the Board has consistently advised its shareholders and the broader market that it would keep under review its capital management policy having regard to the Company's financial position, technology investment requirements, its go to market strategy, product development and market outlook for its product offerings. Taking these matters into consideration the Board has decided it is appropriate to pay a dividend this year".

ABOUT SENETAS CORPORATION LIMITED

Senetas, an Australian public listed company (ASX:SEN), is a leading developer of network data encryption solutions for enterprise, government, defence and technology service providers. From certified high-assurance encryption hardware and virtualised encryption, to the most secure file sharing application providing data sovereignty control, all Senetas solutions are based on the same leading security, high performance and crypto-agile platform.

Senetas encryption solutions leverage state-of-the-art encryption key management and crypto-agility by design, providing long-term data protection in a post-Quantum computing world. They share the same designed-in data protection without compromising network and application performance or user experience.

- CN Series – certified high-assurance hardware encryptors for core IT and network infrastructure.

The CN Series features crypto-agility, uncompromising performance and certifications by multiple independent authorities (C.C., FIPS and NATO), providing Senetas customers with the added confidence that CN Series solutions are state-of-the-art and provide maximum security essential for today's infrastructure.

- CV Series – strong virtualised encryption for large-scale extended and virtualised WANs.

The CV Series virtual encryptor provides >1Gbps performance and is transport Layer agnostic. The CV Series enables rapid scalability, flexibility and cost-effective data protection, all the way to the virtual edge. The CV Series encryptor uses the same high-assurance Senetas CN Series hardware encryption platform.

- SureDrop – the most secure, “box”-type file sharing application with 100% data location control.

SureDrop leverages Senetas's state-of-the-art encryption security to provide secure collaboration and data sovereignty. SureDrop provides the same Senetas crypto-agility, scalability and ease of use as the network data encryption solutions. It is also an ideal solution for service providers' large-scale deployment as a “Security-As-A-Service” customer solution.

Senetas encryptors have been trusted to protect much of the world's most sensitive information for nearly 20 years. They are used to protect everything from government and defence data and secrets, to intellectual property and business data, to financial transactions, CCTV networks, SCADA critical infrastructure control systems and citizen identities.

Senetas CN and CV Series encryptors provide optimised encryption security for everything from modest bandwidth requirements of 10Mbps to the ultra-fast 100Gbps networks required for aggregated Big Data, Cloud and data centre applications.

Senetas encryption solutions are used in more than 35 countries. Senetas encryptors are distributed and supported internationally by Gemalto, the world's largest data security company, under its SafeNet Identity and Data Protection products.
