## **ASX Announcement**

### **Harry Oxe to retire as Director**

Medical Developments International Limited (“MVP”) announced today that long standing non-executive Director Dr. Harry Oxe, intends to step down after the December Board meeting.

Dr. Oxe has been a Director since 2006 bringing valuable skills as a doctor and previous Medical Director of St. John’s Ambulance in Western Australia.

While Dr. Oxe was not up for election at the FY2018 AGM, he feels it is timely to make way for a new director that can bring new insights and experiences to the Board.

Medical Developments Chairman, David Williams, said “Dr. Oxe’s contribution to the board and support to management has been enormous and invaluable. In addition to his normal board role, he often acted for the company talking with foreign drug regulators and others using his deep knowledge of the history and practice of analgesia and Pentrox in particular. He has also been a tremendous support for management in better understanding Pentrox and its many applications across medicine.”

Mr. Williams’ said, “Harry’s contribution to MVP cannot be overstated. He will be greatly missed, but his retirement will be the catalyst to diversify the Board with broader skills in drug and device manufacturing and international marketing and licensing.”
