**SYRAH PRIMARY CLASSIFIER REPAIR COMPLETED AND PRODUCTION RESUMED**

---

Syrah Resources Limited (**ASX: SYR**) ("Syrah" or "Company") advises that the replacement Primary Classifier Unit at the Balama Graphite Operation ("Balama") has been successfully installed and commissioned ahead of schedule.

- Installation and commissioning of the replacement Primary Classifier Unit successfully completed.
- Production resumed with stable ramp up achieved.
- During the repair period, Syrah operated a by-pass and brought forward planned maintenance and production optimisation works to reduce subsequent planned downtime and continue the production improvement plan. Those works were completed as planned, providing confidence for future production performance.

**About Syrah Resources**

*Syrah Resources Limited (ASX code: SYR) is an Australian-based industrial minerals and technology company. Syrah owns and developed the Balama Graphite Project (Balama) in Mozambique. Balama transitioned to operations with sales and shipments to a global customer base including the battery anode producers, from the start of 2018. Balama will be the leading global producer of high purity graphite. Balama production is targeted to supply traditional industrial graphite markets and emerging technology markets. Syrah is also developing a downstream Battery Anode Material plant in Louisiana, USA and has successfully completed extensive product certification test work with several major battery producers for the use of Balama spherical graphite in the anode of lithium ion batteries.
