ASX ANNOUNCEMENT

HV2™ Barrier Approved by Austroads Safety Barrier Assessment Panel

The directors of Saferoads Holdings Limited (**ASX: SRH**) are pleased to announce that our next generation temporary crash barrier, the HV2™ Barrier, has received formal regulatory approval in Australia by the Austroads Safety Barrier Assessment Panel ("ASBAP").

CEO, Mr Darren Hotchkin said, "This is a significant milestone for the commercialisation of this product in Australia and the next step is to progressively obtain relevant State approvals."

"The patented hybrid technology and unique connectors, allow Saferoads' HV2™ Safety Barrier to offer high containment and low deflection, whilst remaining economical to transport and deploy with no time-consuming anchoring required. We believe these features provide significant advantage over peer products, and the HV2™ barrier is the only free-standing steel barrier system speed rated to 100 kph under MASH TL-4 in Australia."

SAFEROADS HOLDINGS LIMITED

www.saferoads.com.au

This follows the recent Federal Highway Administration (FHWA) approval in the United States, announced to the market on 18 October 2018. We have subsequently now lodged numerous applications to obtain local approvals in those US States where we believe we have the greatest opportunity for sales.
