ASX Announcement

Retirement of Allan McCallum as a Director

Medical Developments International Limited (“MVP”) announced today the retirement of long standing non-executive Director, Mr. Allan McCallum.

Mr. McCallum said “the decision to step down was not made easily, however after a lot of thought and consideration toward the increasingly demanding roles as Chairman of the Board for two other ASX listed companies, the time appeared right. More importantly it will provide the company with an opportunity to appoint a new director with a varied skillset and experience.”

Medical Developments Chairman, David Williams, said: “I would like to thank Mr McCallum for his work and support over the years. Mr. McCallum has been a Director since MVP listed in 2003 and has made an invaluable contribution.”

Mr. Williams’ said: “We will use the retirements of Mr. McCallum and Dr. Harry Oxer as a catalyst to diversify the Board with new members who have skills in drug manufacturing and international marketing. MVP is in an exciting place rolling out the “Green Whistle” in Western Europe and elsewhere. We also have some exciting initiatives with the CSIRO and new drug manufacturing technologies. We are looking for people to assist with this next stage of our growth.”
