About eSense-Lab | Registered Office: Level 14, 330 Collins Street, Melbourne, Victoria, Australia, 3000

eSense-Lab Ltd (ASX:ESE) is a life sciences research and development company creating natural plant-based products that heal and delight. Headquartered in Israel, eSense-Lab combines genetics, mRNA, protein expression and phytochemical profiles to generate a comprehensive model of rare or high value plants.

With multi-disciplinary R&D expertise, unique reverse engineering capabilities and game-changing techniques that enable re-engineering the chemical composition found in plants, e-Sense Lab re-formulates these for numerous commercial applications.

Cannabis is the first plant eSense is targeting for re-engineering. eSense is creating a cannabis plant that has all the characteristics of the real thing, but does not contain the psychoactive and more heavily regulated cannabinoid compound.
