USAF Renews Tower Simulator System Support Contract

Melbourne, January 30, 2019 – Adacel Systems Inc. (**Adacel** or the **Company**) announced today that the United States Air Force (**USAF**) has awarded Adacel a contract to continue to provide services in support of the USAF's ATC Tower Simulator System (**TSS**) program.

The original contract for the acquisition and support of ATC tower simulators was awarded to Adacel by the USAF in 2002. Over 100 simulators were delivered by Adacel during the acquisition phase of the program and it remains the largest single contract for ATC simulators ever awarded. The TSS program is now in the sustainment phase and with this new contract award Adacel will retain responsibility for the maintenance, support, and modernisation for the TSS units at US Air Force installations worldwide.

The contract specifies a base year period of performance with four option years that if exercised would continue program support to the end of November 2023. Adacel estimates the value of the contract to be AUD\$32M depending on the options exercised over the 5 year term.

Options over the 5-year term of the contract include services to provide and operate a Training System Support Center, configuration management, a web-based integrated data environment, 24/7 on-call support, hardware technical refresh, operator training, visual database updates, software engineering upgrades, TSS relocation when required and routine maintenance.
