

QUARTERLY REPORT & APPENDIX 4C 31 DECEMBER 2018

CURRENT HIGHLIGHTS

- Cash balance of \$3.0 million at 31 December 2018
- Receivables of \$1.4m at 31 December 2018, \$1m collected by mid-January
- Singtel Singapore operations fully implemented
- Office of Public Prosecutions (OPP) annual renewal, with 17% licence number increase
- Total licences on issue now over 38,500, up 115% in past 12 months

Knosys Limited (ASX: KNO) ("Knosys" and "Company") is pleased to report on its December 2018 quarter.

During the quarter Knosys fully implemented its knowledge management system, KnowledgeIQ, within Singtel's Singapore operations and also completed the annual licence renewal of the OPP contract, with a 17% increase in licensed users over the prior year.

The December quarter completes a strong half year, where Singtel, Optus and ANZ Bank were solidified as major customers, demonstrating the value of KnowledgeIQ for these customers.

The total licence count at December 2018 was over 38,500, representing a 115+% increase compared to December 2017.

The total user licences increased in the December 2018 quarter, due mainly due to the implementation at Singtel's Singapore operations. The continued growth in user licence numbers is displayed in the adjacent chart.

Knosys Managing Director John Thompson said "In the past quarter, we have consolidated our position with our key enterprise and mid-tier customers and have continued to expand our sales reach, marketing efforts and our pipeline. We are excited by the new business opportunities that have resulted from our increased sales and marketing efforts."

"We are clearly focused on building our sales and marketing capabilities and are looking to complement these efforts with the development of key partnerships and resellers, where these make commercial sense for all parties. During the next quarter we intend to broaden our APAC footprint with the opening of our Singapore office and we will also launch our new KIQ cloud service in Australia and Singapore at the same time."

"We are continuing our active M&A process to identify companies who are delivering innovative new solutions that automate processes, increase productivity, or reduce risk within a business. We are aiming to find appropriate opportunities to accelerate our growth by delivering complementary products to an expanded customer base."

Appendix 4C Quarterly statement of cash flows

The ASX Appendix 4C quarterly statement is attached to this report.

The cash balance at 31 December 2018 was \$3.0 million with net operating cash outflows of \$809k for the quarter, including inflows of \$0.2m from sales receipts. Knosys had estimated that it would receive a further \$1m in debtor receipts in the December 2018 quarter, however payment of such was received in early/mid January 2019. Although the timing of these large receipts was not as forecast, it was pleasing to receive these significant customer payments.

Gross operating cash outflows included an increased sales and marketing spend and capex for new premises.

As required in Section 9 of the Appendix 4C, gross operating outflows for the March 2019 Quarter are estimated at \$990k of operating cash outflows, and \$100k of capital expenditure related to the office relocation and fitout.

The Appendix 4C does not allow for estimates of operating cash inflows, however the company estimates that the gross operating cash outflows will be offset by operating cash inflows in the March 2019 quarter, with over \$1.0m having been received at the date of this report.

The Company's revenue model has predominantly been based on billing customers annually in advance. This is reflected in the quarterly cash flow fluctuations. Licence fees invoiced annually in advance are recognised as revenue in the financial accounts each month as the revenue is earned evenly over a 12 month period. Higher customer cash receipts have typically been received in June/July of each year, due to large annual licence renewals, with lower receipts in other months. However, the addition of Singtel and Optus as major customers now provides a spread of cash inflows to Knosys across other quarterly cashflow periods, albeit these cashflows are subject to a mix of annual payments and monthly payments.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
