

Imugene Announces Presentation on HER-Vaxx Cancer Vaccine at the American Association for Cancer Research 2019 Annual Meeting

SYDNEY, Australia, 28 February 2019: Imugene Limited (ASX:IMU), a clinical stage immuno-oncology company, today announced Professor Ursula Wiedermann will present on the HER-Vaxx cancer vaccine at the American Association for Cancer Research (AACR) 2019 Annual Meeting.

The poster (abstract number 8249) will be presented by Prof Wiedermann, the co-inventor of the HER-Vaxx cancer vaccine and member of the Company's Scientific Advisory Board, at the AACR Annual Meeting in Atlanta, Georgia scheduled for March 29 to April 3, 2019.

The abstract presentation is entitled 'A Phase Ib open label multicenter study with a HER2/neu peptide vaccine administered with cisplatin and 5-fluorouracil or capecitabine chemotherapy shows safety, immunogenicity and clinical response in patients with HER2/Neu overexpressing advanced cancer of the stomach.'

The abstract was authored by Prof Wiedermann and researchers at the Medical University of Vienna in Austria and Imugene Limited.

Imugene's HER-Vaxx is a B-cell peptide cancer vaccine designed to treat tumours that over-express the HER-2/neu receptor, such as gastric, breast, ovarian, lung and pancreatic cancers. The immunotherapy is constructed from several B cell epitopes derived from the extracellular domain of HER-2/neu. It has been shown in pre-clinical studies and in Phase I studies to stimulate a potent polyclonal antibody response to HER-2/neu, a well-known and validated cancer target.

The content of the presentation is embargoed until the start of the conference and will be made available online after the start of the meeting and on the Imugene website.

About Imugene (ASX:IMU)

Imugene is a clinical stage immuno-oncology company developing a range of new and novel immunotherapies that seek to activate the immune system of cancer patients to treat and eradicate tumors. Our unique platform technology seeks to harness the body's immune system to generate antibodies against tumours, potentially achieving a similar or greater effect than synthetically manufactured monoclonal antibody therapies. Our product pipeline includes multiple immunotherapy B-cell vaccine candidates aimed at treating a variety of cancers in combination with standard of care drugs and emerging immunotherapies. We are supported by a leading team of international cancer experts with extensive experience in developing new cancer therapies with many approved for sale and marketing for global markets.

Our vision is to help transform and improve the treatment of cancer and the lives of the millions of patients who need effective treatments. This vision is backed by a growing body of clinical evidence and peer-reviewed research. Imugene is well funded and resourced, to deliver on its commercial and clinical milestones. Together with leading specialists and medical professionals, we believe Imugene's immuno-oncology therapies will become a foundation treatment for cancer. Our goal is to ensure that Imugene and its shareholders are at the forefront of this rapidly growing global market.
