What's unique about iSignthis?

Onboarding speed and reach is critical. Paydentity provide a means for banked/financially included customers to be 'passported' to other financial services. Paydentity can reach, identify, verify and take payment at the same time from 4.2bn persons, or 69% or the worlds population. A poor onboarding process can deter more than 80% of prospective customers, especially when regulatory requirements such as AML/CFT Know Your Customer apply.

Speed to checkout and payment choice are critical too. ISXPay peers the leading global payment service providers globally, and is far more advance than any other Australian Bank. ISXPay has reached terms with all the major card schemes in the EU and/or Australia, including Visa, Mastercard, China UnionPay, Diners, Discover, JCB, and American Express, as well as a number of alternative payment methods (APM's).

Speed to payout is emerging as the next most important aspect for the customers of our financial services merchants. The ability to move funds quickly and to a variety of destination accounts is a critical selling point for merchants to their customers.

Serious Multi-currency choice – we offer between 16-23 currencies natively to our merchants, such that they can accept and we will settle in many of the worlds most popular currencies (with some exotics!)

Deposit taking capability, IBAN accounts, zero credit risk facilities with Eurosystem Authorised central banking. Use of IBAN account to link all the above services via a customer.

Multi Region Capabilities – our customers primarily operate in the UK, the EEA and Australia. ISX is positioned to offer solutions via a single relationship and technical integration.

Our own technology : We've researched, patented, designed and developed our own key platforms inhouse. We can leverage our products to maximise our opportunities, without paying royalties & fees for core services.

Technology Group : Probanx Systems Ltd & UAB Baltic Banking Services (BBS)

iSignthis is now a leading provider in cloud based core banking & networking. The iSignthis technology group services financial institutions by offering a complete CORE banking banking software solution (CorePLUS®) together with CoreConnect networking. The services are available as SaaS, leasing and licensing.
