

## **QUARTERLY ACTIVITIES REPORT – MARCH 2019**

Manalto Limited (MTL.ASX) (“Manalto” or “the Company”) provides the following summary of activities for the quarter ended 31 March 2019.

### **OPERATIONS UPDATE**

During the March 2019 Quarter, the development team continued their focus on the maintenance of the Manalto platform.

The team in South Africa, despite facing funding challenges, has continued to maintain and roll out small technology updates to the core platform to ensure an optimal operating solution.

Further evaluations have taken place within the technology stack of the platform to find more operational efficiencies.

There will be continued evaluation and testing of the social networks API's with a special focus to ensure privacy of customer data with the Manalto platform.

Business as usual continues with the development and technical team assisting the front end of the organization and the company's customers with raised service requests and customer queries.

The development team is steadily working on the roadmap development of:

- Next phase evaluation for the use of IBM Watson
- BI Data analysis and advanced reporting via Microsoft Power BI
- Increased focus on the improvement of UX of the Manalto UI.

Obviously, the pace at which these long-term development items are progressing is slower than Manalto had hoped for due to the funding constraints during the quarter.
