AVA secures new FFT Aura Ai-2 contracts valued at A\$691K

- Recently launched Aura Ai-2 secures further customer wins in the USA
- Existing global petrochemical customer to upgrade to Aura Ai-2
- Aura Ai-2 to protect perimeter of high security US Government Facility

AVA Risk Group Limited (ASX: AVA) announces that it has signed new contracts in the United States totalling circa A\$691K (US\$473K).

Leveraging its advanced capabilities, Aura Ai-2 was selected to protect the extended perimeter of a petrochemical facility located in the US Gulf Coast region. Reflective of our innovation and product leadership, and customer centric ethos, this long standing customer is upgrading the entire site from FFT Secure Fence to the latest generation Aura Ai-2 technology.

A new US Government Facility located on the West Coast will use Aura Ai-2 to protect its perimeter. This new contact follows the 27 May 2019 announcement regarding Aura Ai-2 being selected to protect the perimeters of two other high security US Government sites.

AVA Risk Group CEO Scott Basham said: *"Aura Ai-2 continues to be adopted by high-security agencies for the protection of sensitive sites, borders and critical infrastructure, with particular momentum in North America. Both new and existing customers of FFT's intrusion detection solutions can see the added benefits of the new Aura Ai-2 platform which includes bi-directional cut immunity and longest linear range in the market. With FFT's SecureFence product already installed at hundreds of sites around the globe, we anticipate that many of our long-term customers who now understand the enhanced performance capabilities of our Aura Ai-2 technology, will be looking to upgrade to this new standard at the earliest opportunity."*

About the Ava Group

The Ava Group, comprising world leading technology divisions Future Fibre Technologies (FFT) and BQT Solutions (BQT) is a market leader in the provision of risk management services and technologies, trusted by some of the most security conscious commercial, industrial, military and government clients in the world.

The Group features a range of complementary solutions including intrusion detection for perimeters, pipelines and data networks, biometric and card access control as well as the secure international logistics and storage of high value assets.
