

## Shareholder Update

### Technology Acquisition & Voluntary Suspension Update

**Tuesday 9 July 2019:** Environmental Clean Technologies Limited (ASX: ECT) (ECT or Company) is pleased to provide the following update on the completion of the acquisition of a new waste-to-energy (WTE) technology.

The acquisition has been completed and all matters relevant to the settlement of this transaction have been finalised.

The Company is finalising the full announcement and will remain in suspension until its release.

#### About ECT

ECT is in the business of commercialising leading-edge energy and resource technologies, which are capable of delivering financial and environmental benefits.

We are focused on advancing a portfolio of technologies, which have significant market potential globally.

ECT's business plan is to pragmatically commercialise these technologies and secure sustainable, profitable income streams through licensing and other commercial mechanisms.

#### About Coldry

When applied to lignite and some sub-bituminous coals, the Coldry beneficiation process produces a black coal equivalent (BCE) in the form of pellets. Coldry pellets have equal or superior energy value to many black coals and produce lower CO<sub>2</sub> emissions than raw lignite.

#### About Matmor

The Matmor process has the potential to revolutionise primary iron making.

Matmor is a simple, low cost, low emission production technology, utilising the patented Matmor retort, which enables the use of cheaper feedstocks to produce primary iron.
