SECONDARY TRADING NOTICE PURSUANT TO SECTION 708A(5)(E) OF THE CORPORATIONS ACT

BidEnergy Limited (ASX: BID) ("BidEnergy" or the "Company") gives this notice pursuant to section 708A(5)(e) of the Corporations Act 2001 (Cth) ("**Corporations Act**").

The Company advises that it has issued fully paid ordinary shares in the capital of the Company ("**Securities**") per the attached Appendix 3B.

The Company advises that the Securities were issued without disclosure to investors under Part 6D.2 of the Act. The Company, as at the date of this notice, has complied with:

- (a) the provisions of Chapter 2M of the Act as they apply to the Company; and

As at the date of this notice there is no information to be disclosed which is excluded information (as defined in section 708A(7) of the Corporations Act) that is reasonable for investors and their professional advisers to expect to find in a disclosure document.

Notwithstanding this, BidEnergy notes that in its ordinary course of business, it is continually working with prospective customers on active proposals to join BID's proprietary energy spend management platform, some of which may, in the future, prove to be material and potentially price sensitive. In the event that any such customer proposals become sufficiently certain or material enough to warrant disclosure to the market, the Company will comply with its disclosure obligations at that time.

About BidEnergy

BidEnergy is an Australian-based technology company with additional offices overseas in the USA and UK. BidEnergy's cloud-based platform simplifies the complex energy spend management process by using automation, enabling organisations to have complete control over their energy spend.

Unlike manual consulting and business services, the platform automates the management of every component of the process for multi-site companies. By automatically capturing and validating invoices and meter data, BidEnergy clients can streamline their accounting and payments processes, go to market at short notice to optimise their supply contracts and reduce billing charges using sophisticated analytics and reporting.

BidEnergy's innovative Robotic Process Automation ("RPA") platform gives small to large enterprises greater control over the full energy spend lifecycle, particularly where there is a national multi-site configuration. Further, under these agreements, BidEnergy's RPA platform will be utilised to automatically capture and validate invoices, automating the payable function, discovering cost reduction opportunities and providing real-time Energy information and accurate financial capabilities at the touch of a button, as and when they need it.
