Royal Rehab Integrates Public and Private Systems with MasterCare PAS Solution

Global Health is pleased to announce that Royal Rehab Private hospital, the preeminent provider of rehabilitation and disability support services in Sydney, has executed a contract for the implementation of Global Health's **MasterCare PAS** (Patient Administration System) software for hospitals.

MasterCare PAS will support the workflow from admission through to discharge of patients at the co-located private hospital, managing all aspects of patient information flow from beds and medical records to billing, private health fund claims and receipting. The expected benefits include improved productivity, streamlined reporting and prompt payments from private health funds.

Royal Rehab inpatient and outpatient services will use features from their existing public hospital software in parallel with **MasterCare PAS** with information sharing achieved through Global Health's e-Switch and ReferralNet integration platform.

The implementation and site configuration will include information exchange with existing third-party meal orders, electronic medical records and pharmacy dispensing systems, with **MasterCare PAS** hosted with Global Health's Altitude cloud hosting management service. Future plans include integration with Royal Rehab's finance system, Microsoft Dynamics.

A key benefit is the streamlined statutory and regulatory reports to NSW Health, Private Hospitals Inpatient Statistics Collections (PHISCo) and to the Australasian Rehabilitation Outcomes Centre (AROC) which will be automatically captured within **MasterCare PAS** and uploaded into the relevant reporting systems. Improved data access will also provide invaluable financial and business insights to support continuous improvement.

Royal Rehab's Chief Executive Officer, Matthew Mackay said "Royal Rehab embraces technology that brings operational advancements and improved customer experiences. We decided to implement the Global Health solution as we wanted a proven organisation that could work with us during a period of significant growth and provide a system that would suit our long-term strategy for e-health adoption. MasterCare is set to deliver a seamless experience, improved efficiencies and reporting organisation-wide".

"Global Health's suite of hospital applications is increasingly the solution of choice for rehabilitation hospitals in Australia, with Royal Rehab joining a growing list of **MasterCare PAS** rehabilitation facilities." said Mathew Cherian, CEO, Global Health. "Royal Rehab has a reputation for excellence and it is a privilege for **MasterCare PAS** to be selected as the platform to keep them at the forefront of rehabilitation service delivery."

MasterCare PAS is scheduled to go live at Royal Rehab Private in October 2019.
