## **Hansen to deliver new meter data management product to Finland's Elenia**

Hansen Technologies Limited (ASX: HSN) is pleased to announce the signing of a multi-year contract with Finnish-based Elenia, for the implementation of our next-generation meter data management (MDM) product for the Nordic energy market.

Hansen's new MDM product, which is cloud-based and delivered under a SaaS model, is specifically designed to fulfil the industry needs of a new interface with the energy market datahubs being implemented throughout the Nordic region. The Finnish datahub is expected to go live in early-2021.

Elenia is the second largest distribution system operator (DSO) in Finland with over 430,000 customers.
