

TYMLEZ Blockchain solution now available on SAP HANA®

SAP is the largest enterprise server that processes approximately 77% of global transactions

Melbourne, Australia and Amsterdam, Netherlands, 19 September 2019: TYMLEZ Group Limited (ASX:TYM) (**TYMLEZ** or the **Company**), a leader in enterprise software and technology solutions utilising commercial grade blockchain technology, is pleased to announce that the TYMLEZ Blockchain Solutions Platform (**TBSP**) for the SAP HANA® platform is ready for release.

As highlighted in the Half Yearly review of operations on 30th August, TYMLEZ has focused on developing solutions specifically targeting the enterprise client. The work with SAP HANA® over the last 6 months forms a cornerstone of this multi-layer platform strategy.

The completion of integration of TYMLEZ and SAP HANA® solutions, provides the capability to embed blockchain capabilities directly into the SAP HANA® stack. TYMLEZ is not aware of any other application able to be embedded inside the SAP HANA® stack and all other applications will therefore require a plug in to the SAP HANA® stack which involves replicating data or remote access of data and slower processing speed. The TYMLEZ capability is therefore more powerful by enabling clients to leverage all SAP HANA® benefits including unrivalled transaction processing efficiencies, natively within their current environment, without any data replication. The existence of TYMLEZ blockchain within the SAP HANA® Platform also facilitates the intelligent enterprise ability to embed blockchain capabilities including smart contracts within any business process.

TYMLEZ believes that SAP HANA® is the undisputable leader in near-future enterprise software solutions and will provide significant opportunities to deploy the TYMLEZ Blockchain Solutions Platform or TBSP directly into this large scale enterprise client base.

About SAP

SAP is the market leader in enterprise application software, helping companies of all sizes and in all industries run at their best: an estimated 77% of the world's transaction revenue touches an SAP system. The SAP end-to-end solutions feature a user interface designed with optimised cloud experience. SAP services over 400,000 customers in more than 180 countries. With more than 186 million subscribers in its cloud user base, SAP reported €25 billion total revenue in FY2018.

About SAP HANA®

SAP HANA® provides the intelligent enterprise with cloud or on-premise solutions to meet the changing and challenging landscape of technology innovation. With capability to scale cost-effectively and provide modernized agility, the SAP HANA® platform lets SAP clients perform all transactions and analytic processing in-memory. These capabilities allow clients to leverage latest technologies such as machine learning, artificial intelligence and real-time analytics, while making data instantly available from a single system. With more than 30,000 customers in Q2 2019, SAP HANA® is the market-leading platform for real-time computing.
