

## **TYMLEZ SELECTED BY VRIJE UNIVERSITEIT OF AMSTERDAM**

*TYMLEZ Platform used by the VU Amsterdam to build smart contracts*

**Amsterdam, Netherlands, 6 November 2019:** TYMLEZ Group Limited (ASX:TYM) (**TYMLEZ** or the **Company**), a leader in enterprise software and technology solutions utilising commercial grade blockchain technology, is pleased to announce the Vrije Universiteit of Amsterdam has incorporated the TYMLEZ Blockchain Solution Platform as a teaching foundation for building smart contracts.

The Vrije Universiteit (VU) Amsterdam was founded in 1880, and ranked among the world's top universities. VU has approximately 25,000 registered students, most of whom are full-time students. The university has 2,263 faculty members and researchers, and 1,410 administrative, clerical and technical employees, based on FTE units.

Associate Professor Dr. Jaap Gordijn is the inventor of the e3value method and lectures at the Computer Science department of the VU. TYMLEZ and VU have been working together on methods of modelling sustainable blockchain based business cases. Prof. Jaap chose to integrate the TYMLEZ Blockchain Solution Platform as part of the lecture material for students to model smart contracts.

Moreover, Tymlez and VU jointly research governance models for blockchain business cases, amongst others by means of a joint PhD. Candidate.

Reinier van der Drift, co-founder of TYMLEZ, said:

*"We are proud and excited to collaborate with VU Amsterdam to further mature blockchain technology for the enterprise. The cooperation with the University not only enhances our solution but our organization too as we've already onboarded very talented employees via the VU."*

Jaap Gordijn, Associate Professor at the VU, said:

*"Whereas most blockchain platforms only focus on the chain and smart contracts themselves, Tymlez adds to solid deployment options for various enterprise use cases, and a plugin systems that can be used by third parties to extend the Tymlez platform easily. This can span off a whole new business, namely high value blockchain and smart contract plugins".*
