QTC Wins \$0.90m Export Order

Traffic Technologies Ltd (ASX: TTI) (the Company) is pleased to announce that its subsidiary, Quick Turn Circuits (QTC), has secured a significant export order for the supply of traffic controllers and associated software to Hong Kong.

In line with the Traffic Technologies stated objective to continue diversifying our markets through the development of export opportunities, the Company via its wholly owned subsidiary QTC continues to expand its presence in Hong Kong.

Commenting on the contracts, Managing Director Con Liosatos said: "Our export initiatives are in line with the Company's strategy of diversification and increasing its presence in key markets across a broader framework of hardware, software and Smart City deliverables.

Traffic controllers and associated software to be supplied under this contract win in Hong Kong will be installed in the developing area of Kai Tak Airport and surrounding precincts. This contract secures the Company's position as a major provider of traffic signal controllers, software and systems across the region.

All orders are expected to be supplied in the 2019 calendar year."
